M. FLOOD PLAIN (OVERLAY) DISTRICT DEFINITIONS: For the purposes of Section XI, the following terms are defined below:

AREA OF SPECIAL FLOOD HAZARD: The land in the floodplain within a community subject to a one percent (1%) or greater chance of flooding in any given year. The area may be designated as Zone A, AO, AH, AI-30, AE, A99, VI-30, VE, or V. BASE FLOOD: The flood having a one percent chance of being equaled or exceeded in any given year.

COASTAL HIGH HAZARD AREA: An area of special flood hazard extending from offshore to the inland limit of a primary frontal dune along an open coast and any other area subject to high velocity wave action from storms or seismic sources. The area is designated on a FIRM as Zone VE.

DEVELOPMENT: Any man-made change to improved or unimproved real estate, including but not limited to building or other structures, mining, dredging, filling, grading, paving, excavation or drilling operations.

DISTRICT: Section XI, the Flood Plain District.

FEDERAL EMERGENCY MANAGEMENT AGENCY (FEMA): The agency administering the National Flood Insurance Program. FEMA provides a Nation wide flood hazard area mapping study program for communities as well as regulatory standards for development in the flood hazard areas.

FLOOD INSURANCE RATE MAP (FIRM): An official map of a community on which FEMA has delineated both the areas of special flood hazard and the risk premium zones applicable to the community.

FLOOD INSURANCE STUDY: An examination, evaluation, and determination of flood hazards and if appropriate, corresponding water surface elevations or an examination, evaluation and determination of flood-related erosion hazards.

FLOODWAY: The channel of a river or other watercourse and the adjacent land areas that must be reserved in order to discharge the base flood without cumulatively increasing the water surface elevation.

LOWEST FLOOR: The lowest floor of the lowest enclosed area (including basement or cellar). An unfinished or flood resistant enclosure, usable solely for parking of vehicles, building access or storage in an area other than a basement area is not considered a building's lowest floor, provided that such enclosure is not built so as to render the structure in

violation of the applicable non-elevation design requirements of NFIP Regulations 60.3.

**MANUFACTURED HOME (MOBILE HOME):** A structure, transportable in one or more sections, which is built on a permanent chassis and is designated for use with or without a permanent foundation when connected to the required utilities. For floodplain management purposes the term "manufactured home" also includes park trailers, travel trailers and other similar vehicles placed on a site for greater than one hundred eighty (180) consecutive days. For insurance purposes, the term "manufactured home" does not include park trailers, travel trailers and other similar vehicles.

**MANUFACTURED (MOBILE) HOME PARK OR SUBDIVISION:** A parcel (or contiguous parcels) of land divided into two (2) or more manufactured home lots for rent or sale.

**NEW CONSTRUCTION:** For floodplain management purposes, structures for which the "start of construction" commenced on or after the effective date of a floodplain management regulation adopted by a community. For the purpose of determining insurance rates, new construction means structures for which the "start of construction" commenced on or after the effective date of an initial FIRM or after December 31, 1974, whichever is later.

**ONE-HUNDRED-YEAR FLOOD:** See Base flood.

**REGULATORY FLOODWAY:** See Floodway.

**SPECIAL FLOOD HAZARD AREA:** An area having special flood and/or flood-related erosion hazards and shown on an FIRM as Zone A, AO, AI-30, AE, A99, AH, V, VI-30 or VE.

**STRUCTURE:** For floodplain management purposes, a walled and roofed building, including a gas or liquid storage tank, that is principally above ground, as well as a manufactured home. Structure, for insurance coverage purposes, means a walled and roofed building other than a gas or liquid storage tank that is principally above ground and affixed to a permanent site, as well as a manufactured home on foundation. For the latter purpose, the term includes a building while in the course of construction, alteration or repair, but does not include building materials or supplies intended for use in such construction, alteration, or repair, unless such materials or supplies are within an enclosed building on the premises.

**SUBSTANTIAL DAMAGE:** Damage of any origin sustained by a structure whereby the cost of restoring the structure to its before-damaged condition would equal or exceed fifty (50) percent of the market value of the structure before the damage occurred.

**SUBSTANTIAL IMPROVEMENT:** Any repair, reconstruction or improvement of a structure, the cost of which equals or exceeds fifty (50) percent of the market value of the structure either (a) before the improvement or repair is started, or (b) if the structure has been damaged and is being restored, before the damage occurred. For the purposes of this definition, "substantial improvement" is considered to occur when the first alteration of any wall, ceiling, floor or other structural part of the building commences, whether or not that alteration affects the external dimensions of the structure.

**ZONE A:** The one hundred (100) year floodplain area where the base flood elevation (BFE) has not been determined. To determine the BFE, use the best available Federal, State, local or other data.

**ZONE AE (for new and revised maps):** The one hundred (100) year floodplain where the base flood elevation has been determined.

**ZONE AH AND ZONE AO:** The one hundred (100) year floodplain with flood depths of one (1) to three (3) feet, where a clearly defined channel does not exist, where the path of flooding is unpredictable and where the velocity flow may be evident. Such flooding is characterized by ponding or sheet flow.

ZONE A99: Areas to be protected from the one hundred (100) year flood by federal flood protection system under construction. Base flood elevations have not been determined.  
 ZONE X: Areas identified in the community flood insurance study as areas of moderate or minimal flood hazard. Zone X replaces Zones B and C on new and revised maps.
