Subject: Blue ribbons/ agenda request

Hi Allin Frawley directed me to you. I messaged him about putting up blue ribbons in support of our law enforcement. He suggested I email you and ask to be added to the agenda. My group, Angels in America, is working with the Massachusetts State Police Wives to cover the state in blue ribbons to show our support of Law Enforcement. They would go up on Oct. 1. They would be in the center and hopefully on public buildings. If you have any additional questions feel free to email or call. 774-259-9173. If we need to be there please let me know when and we will do our best. Thank you!

LOCATION RELEASE

SERIES / PROGRAM TITLE: "Afraid of Nothing" (documentary)
PRODUCTION DATE: Sunday, September 25, 2016

Permission is hereby granted to Robert M. Heske to use the property located at

Peter Oliver House
433 Plymouth Street
Middleboro, MA 02346

consisting of walking the grounds and building with crew and an EVP expert (Michael Markowitz) for the purpose of photographing and recording scenes for the above program produced by Robert M. Heske. This will include an interview with Leilani Dalpe providing history on the location, and a tour of the building and premises capturing anything the EVP technician picks up from the physical and spiritual surroundings.

Permission includes the right to bring personnel and equipment onto the property and to remove them after completion of the work. The permission herein granted shall include the right, but not the obligation, to photograph the actual name connected with the premises and to use such name in the program(s).

The undersigned hereby gives to Robert M. Heske, its assigns, agents, licensees, affiliates, clients, principals, and representatives the absolute right and permission to copyright, use, exhibit, display, print, reproduce, televise, broadcast and distribute, for any lawful purpose, in whole or in part, through any means without limitation, any scenes containing the above described premises, all without inspection or further consent or approval by the undersigned of the finished product or of the use to which it may be applied.

Robert M. Heske hereby agrees to hold the undersigned harmless of and free from any and all liability and loss which Robert M. Heske, and/or its agents, may suffer for any reason, except that directly caused by the negligent acts or deliberate misconduct of the owner of the premises or its agents.

The undersigned hereby warrants and represents that the undersigned has full right and authority to solely enter into this agreement concerning the above described premises, and that the undersigned hereby indemnifies and holds Robert M. Heske, and/or its agents, harmless from and against any and all loss, liability, costs, damages or claims of any nature arising from, growing out of, or concerning the use of the above described premises except those directly caused by the negligent acts or deliberate misconduct of Robert M. Heske, or its/his/her agents.

FROM: Board of Selectmen 

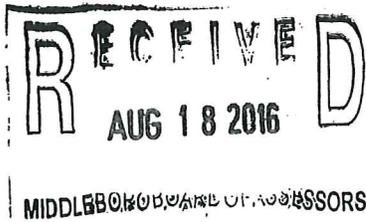

DATE: August 23, 2016

RE: Town's Option to Buy Chapter Land

The Board of Selectmen has received notice that George Nielsen of Plymouth and Helen M. Belmont of Middleborough have signed a Purchase & Sale Agreement for the property located off Precinct Street, Assessors Map 032, Lot 155 and Lot 977; Map 023, Lot 5769. This property contains a total of approximately 68.0 acers of 61 land.

Please submit written comments regarding this property to the Board by **Thursday, September 22, 2016 at noontime.**

Thank you.

RE: Notice of Intent to Sell for Use under Chapter 61 as to Land
Off Precinct Street, Middleboro, MA (Map 032, Lot 155 and Lot 977;
Map 023, Lot 5769), Totaling Approximately 68.0 acres

Dear Sirs:

Pursuant to Chapter 61 of the Massachusetts General Laws, this Notice is being provided to you by George Nielsen and Helen Belmont, owners of the record of land that is subject to this Notice. Said land is classified and assessed as forestry use under the provision of Chapter 61.

It is the intent of George Nielsen and Helen Belmont to sell the land for residential use in accordance with a bona fide offer the terms of which are set forth in a Purchase and Sale Agreement between George Nielsen and Helen Belmont as Sellers and Timothy Hashem as Buyer dated August 5th, 2016. A true copy of said agreement is enclosed herewith. As you know, because of this Notice the Town of Middleboro has a certain option to purchase the land under the provisions of General Laws, Chapter 61.

Thank you for your review of, and consideration in this matter. Copies of this Notice have been sent by certified mail to the above Town Boards and the Division of Forestry.

George Nielsen
Helen Belmont

Board of Selectmen
10 Nickerson Avenue
Middleboro, MA 02346

Honorable Members,

George Nielsen & Helen Belmont, owners of land located on and off Precinct Street in Middleborough and shown as lots 155 & 977 on Assessors' map 032 & as lot 5769 on Assessors' map 023 have informed our office that they intend to sell or convert land which is currently classified under Chapter 61 to other use.

The Board of Assessors has no objection to the removal of this land from Chapter 61 Forestry classification.

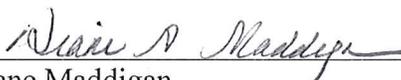

Sincerely,

Anthony F. Freitas, Chairman

Paula Burdick

Diane Maddigan
Middleborough Board of Assessors

VOTE OF THE BOARD OF SELECTMEN

I, the Clerk of the Board of Selectmen of the Town of Middleborough, Massachusetts (the "Town"), certify that at a meeting of the board held September 26, 2016, of which meeting all members of the board were duly notified and at which a quorum was present, the following votes were unanimously passed, all of which appear upon the official record of the board in my custody:

Voted: that we hereby determine, in accordance with G.L. c. 70B, that the amount of the cost of the Early Childhood Center roof replacement project authorized by a vote of the Town passed on April 25, 2016 (Article 6) not being paid by the school feasibility study grant is \$563,380 and we hereby approve of the issuance of notes and bonds in such amount under said G.L. c. 70B.

Further Voted: that the sale of the \$2,935,724 General Municipal Purpose Loan of 2016 Bonds of the Town dated October 5, 2016 (the "Bonds"), to Roosevelt & Cross, Inc. at the price of \$3,022,443.61 and accrued interest, if any, is hereby approved and confirmed. The Bonds shall be payable on October 1 of the years and in the principal amounts and bear interest at the respective rates, as follows:

<u>Year</u>	<u>Amount</u>	<u>Interest Rate</u>	<u>Year</u>	<u>Amount</u>	<u>Interest Rate</u>
2017	\$410,724	2.00%	2022	\$305,000	2.00%
2018	400,000	2.00	2023	305,000	2.00
2019	380,000	2.00	2024	290,000	2.00
2020	330,000	2.00	2025	100,000	2.00
2021	315,000	2.00	2026	100,000	2.00

Further Voted: to approve the sale of \$5,168,788 2.00 percent General Obligation Bond Anticipation Notes of the Town dated October 7, 2016, and payable October 6, 2017 (the "Notes"), to Eastern Bank at par and accrued interest, if any, plus a premium of \$54,688.50.

Further Voted: that in connection with the marketing and sale of the Bonds, the preparation and distribution of a Notice of Sale and Preliminary Official Statement dated September 12, 2016, and a final Official Statement dated September 21, 2016 (the "Official Statement"), each in such form as may be approved by the Town Treasurer, be and hereby are ratified, confirmed, approved and adopted.

Further Voted: that in connection with the marketing and sale of the Notes, the preparation and distribution of a Notice of Sale and Preliminary Official Statement dated September 14, 2016, and a final Official Statement dated September 21, 2016, each in such form as may be approved by the Town Treasurer, be and hereby are ratified, confirmed, approved and adopted.

Further Voted: that the Bonds shall be subject to redemption, at the option of the Town, upon such terms and conditions as are set forth in the Official Statement.

Further Voted: that the Town Treasurer and the Board of Selectmen be, and hereby are, authorized to execute and deliver continuing and significant events disclosure undertakings in compliance with SEC Rule 15c2-12 in such forms as may be approved by bond counsel to the Town, which undertakings shall be incorporated by reference in the Bonds and Notes, as applicable, for the benefit of the holders of the Bonds and Notes from time to time.

Further Voted: that we authorize and direct the Treasurer to establish post issuance federal tax compliance procedures in such form as the Treasurer and bond counsel deem sufficient, or if such procedures are currently in place, to review and update said procedures, in order to monitor and maintain the tax-exempt status of the Bonds and Notes.

Further Voted: that each member of the Board of Selectmen, the Town Clerk and the Town Treasurer be and hereby are, authorized to take any and all such actions, and execute and deliver such certificates, receipts or other documents as may be determined by them, or any of them, to be necessary or convenient to carry into effect the provisions of the foregoing votes.

I further certify that the votes were taken at a meeting open to the public, that no vote was taken by secret ballot, that a notice stating the place, date, time and agenda for the meeting (which agenda included the adoption of the above votes) was filed with the Town Clerk and a copy thereof posted in a manner conspicuously visible to the public at all hours in or on the municipal building that the office of the Town Clerk is located or, if applicable, in accordance with an alternative method of notice prescribed or approved by the Attorney General as set forth in 940 CMR 29.03(2)(b), at least 48 hours, not including Saturdays, Sundays and legal holidays, prior to the time of the meeting and remained so posted at the time of the meeting, that no deliberations or decision in connection with the sale of the Bonds or the Notes were taken in executive session, all in accordance with G.L. c.30A, §§18-25, as amended.

Dated: September 26, 2016

Less premium 54,688.50
Net Interest Cost \$48,400.11

PART I

THE NOTES

DESCRIPTION OF THE NOTES

The Notes will be dated October 7, 2016 and will mature on October 6, 2017 with interest at the rate or rates determined upon their sale payable at maturity. The Notes will be issued in book-entry form in principal amounts of \$1,000 or integral multiples thereof, with the exception of one denomination of \$1,788 of the Notes, with transfer of the Notes on the records of The Depository Trust Company ("DTC") and its Participants.

Interest will be computed on a 30/360 (359/360) day year basis. The Notes will be issued without the option of prior redemption. Both principal and interest will be payable to DTC by U.S. Bank National Association, in Boston, Massachusetts, or its successor as Paying Agent to the Town.

Bid Documents Review – 9/20/2016

Specifications:

- Invitation to Bid is missing.
- Table of Contents – Section 00.30.00, General Bids, is numbered 00.41.13 in the body of the specifications.
- 00.21.13 – Provide dates and times.
- 00.21.13 – On page 3, in 7, you list the CPA funds, but not the MPPF funds.
- 00.21.13 – On page 6, in 18, you say the time for bids is listed on the Bid Form, but it is not there.
- 00.21.13 – On page 6, in 22, you forgot to mention that the bidders are required to be DCAM certified in the appropriate fields, especially Historic Preservation.
- 00.73.43 – Provide when ready to go out to bid.
- 01.10.00 – On page 1, in 1.1, you left out Add Alternates and Filed Sub-Bids from the list, even though these areas are covered in this Section.
- 01.10.00 – On page 2, in 1.3, it might be a good idea to move the finish date forward by a few weeks, so as to allow time to make any last-minute fixes.
- 01.10.00 – On page 2, in 1.4, you have not provided any Alternates. Unless the Town is willing to meet any higher bids than estimated, it is smart to include some of the work as Alternates. Then if bids do come in higher than expected, a project with a reduced scope can go forward right away. Otherwise it would be necessary to reduce the scope and go out to bid again.
- 01.10.00 – On page 4, in 1.8, A, the first word can be eliminated.
- 01.10.00 – On page 4, in 1.8, F, this is listed as a separate division in 1.1, rather than a sub-set of Contractor Use of Premises.
- 01.20.00 – On page 3, 1.7 and 1.8 are listing sections numbers that don't exist in the body of the specifications.
- 01.30.00 – On page 1, in 1.2, you left out Examination from the list.
- 01.33.00 – On page 1, in 1.2, you left out Samples from the list.
- 01.40.00 – On page 1, in 1.2, Letters D, E and F list areas not covered in this Section (page three is blank).
- 01.50.00 – On page 2, in 1.10, A, you say the property abuts a livestock area. Is that true?
- 01.50.00 – On page 2, in 1.10, B, you mention DHRS and the Library Building. I am not sure what the first is, and I am pretty sure you want to maintain access to the House.
- 01.50.00 – On page 3, in 1.12, A, you say a sign is not required, but a sign acknowledging the MPPF grant work is a requirement of the program. Please see the instructions and sample sign in Section VI of the LPC Manual.
- 01.60.00 – On page 1, in 1.2, letter F seems unnecessary.
- 02.41.09 – On page 4, in 3.1, E, 1, you direct the reader to the Photographic Documentation section of Division 01, but there is no such section.

- 02.41.09 – On page 3, in 1.9, C, you say no hazardous materials are expected to be found, but wouldn't there be a good possibility of finding lead paint?
- 02.41.09 – On page 4, in 3.1, E, 1, you again point viewers to a Photographic Documentation section that does not exist.
- 02.41.09 – On page 6, in 3.6, A, 4, you direct viewers to the Construction Waste Management and Disposal section, which does not exist.
- I am unclear why there is a Maintenance of Masonry Section and a Mortar and Masonry Grout Section. It seems like all the work would be covered in a single section.
- 04.01.00 – On page 1, in 1.3, letters B and E are for sections which do not exist.
- 04.01.00 – On page 2, 1.8 seems to be instructions for work not covered in this project.
- 04.01.00 – On page 4, in 3.4, A, I believe you mean to say “rake out remaining mortar in joints between two **times** (minimum)”...
- 04.10.00 – On page 1, in 1.3, B, Section 01.70.00 is titled Execution Requirements in the specifications.
- 04.10.00 – On page 2, in 1.7, you should give directions for mock up panels for joint cutting and repointing (give a size). In C, the panels will need to be approved by MHC staff, as well as the Architect. In E, mock up panels should be created by each worker responsible for executing this work.
- 04.10.00 – On page 3, in 2.4, are these mixes based on a historic mortar analysis from the site?
- 06.20.00 – On page 1, in 1.2, B, numbers 1 and 4 are for Sections that do not exist in the specifications.
- 06.20.00 – On page 2, in 1.4, A, Submittal Procedures is actually numbered 01.33.00 in the specifications. In B, this would be Product Requirements: Product Substitution Procedures.
- 06.20.00 – On page 3, in 1.9, a, THIS Section is titled Administrative Requirements, rather than Coordination and Meetings.
- 06.20.00 – On page 3, in 2.2, E, you refer to Sections under Doors and Windows, but you did not include these Sections.
- 06.20.00 – On page 4, in 3.1, A, Section 01.30.00 is actually titled Administrative Requirements. Submittal Procedures is Section 01.33.00. Coordination and Project Conditions falls under Section 01.30.00.
- 07.10.00 – On page 2, in 1.9, A, 2, the Mortar and Masonry Grout Section is numbered 04.10.00 in the specifications.
- 07.62.00 – On page 1, in 1.3, 2 should be numbered 02.41.00 and 4 should be numbered 04.10.00.
- 07.62.00 – On page 4, in 3.5, A, 1, there are no plans for replacing masonry lintels. In 3.5, C, the roofing will be cedar shingles, not asphalt.
- 09.90.00 – On page 1, in 1.3, Sections 07.71.23 and 07.90.00 are not provided in the specifications.
- 09.90.00 – On pages 4 and 5, in 3.2, E, F and G describe work that is not included in this project.

- 09.90.00 – On page 7, in 3.6, B, none of this work is included in this project.

Plans:

- A-1 – In the North-West Elevation, the roof of the Carriage House wing is not drawn correctly, where it meets the Main House. I believe you forgot to indicate the extent of the Carriage House wall under the double window, where you want to have the wood shingle siding replaced.
- A-2 – On the Northeast Elevation, the bulkhead note should direct viewers to Details 2-6, on page A-3. The triangular area between the Main House and the Carriage House roof, is a wall, not a roof. Is the far right, lowest note, indicating the entire side of the Kitchen Wing is being re-shingled, or should a specific area be indicated?
- A-2 – On the Southwest Elevation, there is a note to the left of the Kitchen wing, indicating shingles are to be replaced, but the extent is not indicated. You have two notes indicating that the door trim of the Kitchen Wing door is to be replaced.
- A-3 – It is unclear from the notes on this page and A-2, as to whether the existing bulkhead framing is being retained, or replaced.

Cost Estimate:

- Please provide an updated cost estimate for this project.

**SECTION 00 21 13
INSTRUCTIONS TO BIDDERS**

1. Invitation to Bid

The Town of Middleborough is soliciting sealed bids from qualified bidders for the Peter Oliver Jr. House Exterior Restoration.

Specifications and bid forms may be obtained on **DATE** after 10 AM, and Monday through Friday 9:00 A.M. to 4:00 P.M. thereafter at:

Town of Middleborough
Office of the Select Board
Middleborough Town Hall
10 Nickerson Avenue
Middleborough, MA 02346
Robert G Nunes, Town Manager

For information please contact
Town of Middleborough
Middleborough Town Hall
10 Nickerson Avenue

A \$50 document fee in the form of cash, money order, certified check, bank treasurer's check or bank cashier's check is required and will be refunded to certified bidders only for plans returned in good condition within 14 days after opening general bids. To receive bid documents by mail, send an additional check in the amount of \$25, payable to Town of Middleborough together with a written request to the above address.

A Pre-Bid Conference and Site Visit will be held at the **front entrance of the Peter Oliver Jr. House, 445 Plymouth St. Middleborough MA, 02346** on **DATE** at **10:30 AM**. It is strongly encouraged that all prospective bidders have a representative in attendance.

2. Receipt and Opening of Bids

The Town of Middleborough, herein called the Owner, will receive sealed Bids for the Peter Oliver Jr. House Exterior Restoration. All general bids for this project are to be addressed to:

Town of Middleborough
Office of the Select Board
Middleborough Town Hall
10 Nickerson Avenue
Middleborough, MA 02346

General Construction bids are to be labeled:

Town of Middleborough
Peter Oliver Jr. House Exterior Restoration
Bid for General Construction

Bids for General Construction will be received at the above address until the time specified

below at which time the proposals will be publicly opened and read aloud:

ITEM	BID OPENING
Filed Sub-Bid	N/A
General Construction Bid	12:00 Noon, Thursday, DATE

Any bid may be withdrawn prior to the above scheduled time for the opening of bids or authorized postponement thereof. Any bid received after the time and date specified will not be considered. The bidder agrees that this bid shall be good and may not be withdrawn for a period of 30 days, Saturdays, Sundays, and legal holidays excluded, after the opening of bids.

3. Location and Work to be Done

Work is more specifically described in the attached contract specifications.

The Contractor shall furnish all labor, services, materials, equipment, plant, machinery, apparatus, appliances, tools, supplies, and all other things necessary to do all work required for the completion of each item of the Work and as herein specified.

The Work to be done and paid for under any item shall not be limited to the exact extent mentioned or described but shall include all incidental work necessary or customarily done for the completion of that item.

4. Preparation of Bid

Each bid must be submitted on the prescribed form. All blank spaces for bid prices must filled in, in ink or typewritten, in both words and figures.

Each bid must be submitted in a sealed envelope bearing on the outside the name of the bidder, his address, and endorsed with the name of the project as specified in Receipt and Opening of Bids, above.

If forwarded by mail, the sealed envelope containing the bid must be enclosed in another envelope addressed as specified in Receipt and Opening of Bids, above.

5. Bid Opening Procedure

Bids shall be filed at the place and before the time specified in Receipt and Opening of Bids, above.

Properly executed bid security shall be placed in a sealed envelope and shall be attached to the outside of the envelope containing the bid.

Bid signatures will be checked.

All addenda will be faxed or emailed to all prospective bidders and the last of which will be mailed not later than five days prior to the date established for submission of bids. All bidders shall include with their bids the written acknowledgement form provided in Section 00 41 13, FORM OF GENERAL BID.

The total dollar amount of each bid will be read, and the three apparent lowest bids will be selected for further consideration. These three apparent low bids will be read aloud for the

benefit of the other bidders and the bid opening procedure will be closed. All those present at the bid opening may examine all bids after the bid opening and after the reading of the three apparent low bids.

6. Telegraphic Modification

Any bidder may modify his bid by telegraphic communication at any time prior to the scheduled closing time for receipt of bids, provided such telegraphic communication is received by the Owner prior to the closing time, and, provided further, the Owner is satisfied that a written confirmation of the telegraphic modification over the signature of the bidder was mailed prior to the closing time.

The telegraphic communication shall not reveal the bid price but shall provide the addition or subtraction or other modification so that the final prices or terms will not be known by the Owner until the sealed bid is opened. If written confirmation is not received within two days from the closing time, no consideration will be given to the telegraphic communication.

7. Ability and Experience of Bidder

No award will be made to any bidder who cannot satisfy the Owner that he has sufficient ability and experience in this class of work and sufficient capital and plant to enable him to prosecute and complete the work successfully within the time named. The Owner's decision or judgment on these matters will be final, conclusive, and binding.

This building is listed in the National Register of Historic Places. Partial funding for this work is provided by the Middleborough Community Preservation Act funds. Per the requirements of MGL c149 section 44A, bidders will be deemed "responsible and eligible" only if they meet the qualifications requirements indicated in the specifications for the trades indicated. All sections stipulate the required experience however bidders' attention is directed to the following particular sections for additional detail:

- Section 04 01 00, Maintenance of Masonry
- Section 04 10 00, Mortar and Masonry Grout
- Section 06 20 00, Finish Carpentry
- Section 07 31 29, Wood Shingles Roofing
- Section 07 46 24, Wood Shingles Siding
- Section 09 90 00, Painting

The Owner may make such investigations as he deems necessary, and the bidder shall furnish to the Owner, under oath if so required, all such information and data for this purpose as the Owner may request.

8. Conditions of Work

Each bidder must familiarize himself fully with the conditions relating to the construction of the project and the employment of labor thereon. Failure to do so will not relieve a successful bidder of his obligation to furnish all material and labor necessary to carry out the provisions of his contract. Insofar as possible the Contractor, in carrying out his work, must employ such methods or means as will not cause any interruption of or interference with the work of any other Contractor.

9. Addenda and Interpretations

No interpretation of the meaning of the plans, specifications or other prebid documents will be

made to any bidder orally. All information given to bidders other than by means of the plans, specifications, or by addenda, as described below, is given informally and shall not be used as the basis of a claim against the Owner.

Every request for such interpretation should be in writing addressed to:

Russel Feldman
TBA Architects, Inc
43 Bradford Street Suite 300
Concord, MA 01742
rfeldman@tbaarchitects.com
Telephone: 781-893-5828

and to be given consideration must be received at least four days, excluding Saturdays, Sundays or holidays, prior to the date fixed for the opening of bids. Any and all such interpretations and any supplemental instructions will be in the form of written addenda to the specifications which, when issued, will be emailed and/or electronically posted to all prospective bidders (at the respective address furnished by them for such purposes), not later than two days prior to the date fixed for the opening of bids.

Any attempt to contact any other municipal employee or to circumvent these procedures in any manner may be grounds for disqualification of the bidder from the procurement process.

Failure of any bidder to receive any such addendum or interpretation shall not relieve such bidder from any obligation under his bid as submitted. All addenda so issued shall become part of the Contract Documents.

10. Security for Faithful Performance

Simultaneously with his delivery of the executed Contract, the Contractor shall furnish a surety bond or bonds as security for faithful performance of this contract and for the payment of all persons performing labor and materials under this contract as specified in Section 00 72 14, GENERAL CONDITIONS included herein. The surety on such bond or bonds shall be a surety company qualified to do business under the laws of the Commonwealth and satisfactory to the Owner. The bonds shall remain in force for one year after final acceptance of the work by the Owner, unless the Owner, in writing, releases the Contractor from the obligation sooner.

A payment bond in an amount equal to 100 percent of the total amount of the bid with a surety company qualified to do business in the Commonwealth of Massachusetts will be required for the faithful performance of the contract.

11. Power of Attorney

Attorneys-in-fact who sign Contract bonds must file with each bond a certified and effectively dated copy of their power of attorney.

12. Laws and Regulations

The bidder's attention is directed to the fact that all applicable State laws, municipal ordinances, and the rules and regulations of all authorities having jurisdiction over construction of the project shall apply to the contract throughout, and they will be deemed to be included in the Contract the same as though herein written out in full.

13. Liquidated Damages

For Failure to Enter into Contract: The successful bidder, upon his failure or refusal to execute and deliver the Contract and bonds required within 10 days after he/she has received notice of the acceptance of his/her bid, shall forfeit to the Owner, as liquidated damages for such failure or refusal, a portion of security deposited with his/her bid, but the amount forfeited shall not exceed the difference between his/her bid price and the bid price of the next lowest responsible and eligible bidder. In case of death, disability, bona fide clerical or mechanical error of a substantial nature, or other similar unforeseen circumstances affecting the bidder, his/her bid deposit will be returned.

14. Obligation of Bidder

At the time of the opening of bids each bidder will be presumed to have inspected the site and to have read and to be thoroughly familiar with the Contract Documents (including all addenda). The failure or omission of any bidder to examine any form, instrument, or document shall in no way relieve any bidder from any obligation in respect of his bid.

15. Information Not Guaranteed

All information given in the Contract Documents relating to subsurface and other conditions, natural phenomena, existing pipes, and other structures is from the best sources at present available to the Owner. All such information is furnished only for the information and convenience of bidders and is not guaranteed.

It is agreed and understood that the Owner does not warrant or guarantee that the subsurface or other conditions, natural phenomena, existing pipes, or other structures encountered during construction will be the same as those indicated in the Contract Documents.

If is further agreed and understood that no bidder or Contractor shall use or be entitled to use any of the information made available to him or obtained in any examination made by him in any manner as a basis of or ground for any claim or demand against the Owner or the Architect, arising from or by reason of any variance which may exist between the information made available and the actual subsurface or other structures actually encountered during the construction work, except as may otherwise be expressly provided for in the Contract Documents.

16. Bid Security

Each bid must be accompanied by a certified check, a bid bond, cash, a treasurer's or cashier's check, payable to the Owner, for five percent (5%) of the bid value. Such checks will be returned to all except the three lowest responsible and eligible bidders within five days, Saturdays, Sundays, and legal holidays excluded, after the opening of bids, and the remaining checks will be returned promptly after the Owner and the accepted bidder have executed the Contract, or if no notice of intent to award has been presented to the selected contractor within 30 days, Saturdays, Sundays and holidays excluded, after the date of the opening of bids, upon demand of the bidder at any time thereafter.

17. Right to Reject Bid

The Owner reserves the right to cancel this IFB, should the Owner deem it to be in the public interest to do so.

The Owner reserves the right to waive any informalities or accept or reject, in whole or in part any and all bids, should the Owner deem it to be in the public interest to do so.

The Owner may also reject bids which in its sole judgment are either incomplete, conditional, obscure or not responsive or which contain additions not called for, erasures not properly initialed, alterations, or similar irregularities, or the Owner may waive such omissions, conditions or irregularities.

18. Time for Completion

The bidder must agree to commence work within ten (10) days of the date of the Notice to Proceed and to fully complete the project within the time limit stated in Section 00 41 13, FORM OF GENERAL BID.

19. Comparison of Bids

Bids will be compared on the basis of the quantities and unit and lump sum prices set forth in the bid forms.

In the event that there is a discrepancy in Section 00 41 13, FORM OF GENERAL BID between the lump sum or unit prices written in words and figures, the prices written in words will govern.

The Owner agrees to examine and consider each FORM OF GENERAL BID submitted in consideration of the qualifications of the bidder and the bidder's agreements, as hereinabove set forth and as set forth in Section 00 41 13, FORM OF GENERAL BID.

20. Award of Contract

The Contract will be awarded to "the lowest responsible and eligible bidder" pursuant to General Laws Chapter 149, Section 44A, as amended. Such a bidder shall possess the skill, ability and integrity necessary for the faithful performance of the work, shall be able to furnish labor that can work in harmony with all other elements of labor employed, or to be employed, in the work, and shall otherwise comply with all applicable provisions of law.

21. Statutes Regulating Competitive Bidding

Any bid which does not comply with the provisions of Massachusetts General Laws Chapter 149, Section 44A(2)(C) and c. 30, Section 39M, as amended, need not be accepted and the Owner may reject every such bid.

22. Bidder Experience

General Bidders must be experienced in historic restoration and preservation construction, particularly relating to carpentry and painting trades. A statement identifying the experience of the company and the individuals assigned to the work on this project will be required. Any bid submitted without this experience shall be invalid.

23. Wage Rates

Prevailing Wage Rates as determined by the Commissioner of the Department of Labor and Workforce Development under the provision of the Massachusetts General Laws, Chapter 149, Section 26 to 27G, as amended. It is the responsibility of the contractor, before bid opening, to request if necessary, any additional information on Prevailing Wage Rates for those

tradespeople who may be employed for the proposed work under this contract.

As a convenience to the bidder, the State schedules of Prevailing Wage Rates are included in the General Documents section of the contract documents.

24. Contractor Records

The Contractor shall comply with the provisions of Massachusetts General Laws, Chapter 149, Section 39R, concerning Contractor records.

25. Insurance

The Contractor shall carry and continuously maintain until completion of the Contract, insurance as specified in the Supplemental General Conditions and in such form as shall protect him performing work covered by this Contract, or Town of Middleborough and its employees, agents and officials, from all claims and liability for damages for bodily injury, including accidental death, and for property damage, which may arise from operations under this Contract. The Contractor covenants and agrees to hold the Town and its employees, agents and officials harmless from loss or damage due to claims for personal injury and/or property damage arising from, or in connection with operations under this Contract. The Contractor shall include the Architect as an additional insured.

26. Affirmative Action/Equal Employment Opportunity Laws and Regulations

The Town of Middleborough is an affirmative action/equal opportunity owner/purchaser. The bidder's attention is directed to all applicable State Laws, Town bylaws, and rules and regulations regarding affirmative action/equal employment opportunity requirements. Failure of a bidder to comply with any such law, bylaw, rule or regulation shall constitute grounds for the Town to reject a bid or to otherwise reject or terminate the award of the contract pursuant to these contract documents.

**CONSTRUCTION PAYMENT BOND
SECTION 00 62 00**

KNOW ALL MEN BY THESE PRESENTS: That we _____
(Name of Contractor)

a _____ hereinafter called "Principal" and
(Corporation, Partnership, Joint Venture or Individual)

_____ of _____, State of _____ hereinafter
(Surety) (City)

called the "Surety" and licensed by the State Division of Insurance to do business under the laws of the Commonwealth of Massachusetts, are held and firmly bound to the Town of Dartmouth, hereinafter called

"Owner", in the penal sum of _____ Dollars

(\$ _____) in lawful money of the United States, for the payment of which sum well and truly to be made, we bind ourselves, our heirs, executors, administrators and successors, jointly and severally, firmly by these presents.

THE CONDITION OF THIS OBLIGATION is such that Whereas, the Principal entered into a certain contract

with the Owner, dated the _____ day of _____, 20____, a copy of which is hereto attached and made a part hereof for the construction described as follows:

NOW, THEREFORE, if the Principal shall promptly make payment to all persons, firms, subcontractors, and corporations furnishing materials for or performing labor in the prosecution of the work provided for in such contract, and any authorized extension or modification thereof, including all amounts due for materials, lubricants, oil, gasoline, coal and coke, repairs on machinery, equipment and tools, consumed or used in connection with the construction of such work, and all insurance premiums on said work, and for all labor, performed in such work whether by subcontractor or otherwise, then this obligation shall be void; otherwise to remain in full force and effect.

PROVIDED, FURTHER, that the said Surety, for value received hereby stipulates and agrees that no change, extension of time, alteration or addition to the terms of the contract or to the work to be performed thereunder or the specifications accompanying the same shall in any way affect its obligation on this bond, and it does hereby waive notice of any such change, extension of time, alteration or addition to the terms of this contract or to the work or to the specifications.

PROVIDED, FURTHER, that no final settlement between the Owner and the Contractor shall abridge the right of any beneficiary hereunder, whose claim may be unsatisfied.

IN WITNESS WHEREOF, this instrument is executed in ____ () counterparts, each one of which shall be deemed an original, this the _____ day of _____, 20__.

F. Builder's Risk Insurance - "All Risk" Completed Value Form \$1,000,000

CONTRACTUAL LIABILITY

To the fullest extent permitted by Laws and Regulations, CONTRACTOR shall indemnify, and hold harmless OWNER, the Owner's leaseholder and its consultants, agents and employees from and against all claims, damages, losses and expenses, direct, indirect or consequential (including but not limited to fees and charges of engineers, architects, attorneys and other professionals and court and arbitration costs) arising out of or resulting from performance of the Work, provided that any such claim, damage, loss or expense(s) is attributable to bodily injury, sickness, disease or death, or to injury to or destruction of tangible property (other than the Work itself) including the loss of use resulting therefrom and (b) is caused in whole or in part by any negligent act or omission of CONTRACTOR, any subcontractor, any person or organization directly or indirectly employed by any of them to perform or furnish any of the Work or anyone for whose acts any of them may be liable, regardless of whether or not it is caused in part by a party indemnified hereunder or arises by or is imposed by Law and Regulations regardless of the negligence of any such party.

In any and all claims against OWNER or any of its consultants, agents or employees by any employee of CONTRACTOR, and subcontractor, any person or organization directly or indirectly employed by any of them to perform or furnish any of the Work or anyone for whose acts any of them may be liable, the indemnification obligation under the above paragraph shall not be limited in any way by any limitation on the amount or type of damages, compensation or benefits payable by or for CONTRACTOR or any such subcontractor or other person or organization under workers' or workmen's compensation acts, disability benefit acts or other employee benefits acts.

Policies B, C, D, and E shall remain in effect during the one year correction period.

Such insurance as is herein certified applies to all operations of the insured in connection with, and necessary and incidental to, the work herein described at the locations stated.

It is hereby understood and agreed that the above policies will not be restrictively amended, materially changed nor canceled without 30 days advance notice by registered mail to OWNER.

1.3 CONSTRUCTION SCHEDULE

- A. Start and Completion Date:
 - 1. Coordinate with owner. Start date for onsite work is anticipated for **October 15, 2016**. Completion to be before **June 30, 2017**.

1.4 ADD ALTERNATES

- A. There are no alternates.

1.5 WORK UNDER THIS CONTRACT

- A. The Contractor shall furnish all labor, services, materials, equipment, plant, machinery, apparatus, appliances, tools, supplies, and all other things necessary to do all work required for the completion of each item of the Work and as herein specified.
- B. The Work includes roof replacement, chimney patching and reconstruction, fascia, trim, soffit and gutter replacement as indicated on the drawings, portico column repair and limited trim repair, limited shingle siding replacement, individual window trim and sill repair,
- C. Project Scope of Work:
 - ** This scope of work is provided to the General Contractor as a convenience, it is not intended to limit the scope of work outlined in the Construction Documents.

Div 1. GENERAL PROJECT

- a. Work is to be performed on Town property.

Div 2. Site

- a. Minor demolition as required for the work, including removal of wood trim, fascia, bulkhead door and frame, shingle siding; gutters, downspouts.
- b. Removal of roofs and limited areas of roof deck.
- c. Removal of paving stones as indicated.
- d. Site to be returned to existing condition after work.

Div 3. Concrete Not Used

Div 4. Masonry

- a. Repair and reconstruction of kitchen chimney and flashing
- b. Limited repointing of foundation
- c. Limited repointing of main chimneys.

Div 5. Metals – NOT USED

Div 6. Wood and Plastic

- a. Blocking and carpentry associated with trim repair, clapboard and shingle siding repair, repair of eaves, and installation of new gutters, column repair.
- b. Wood bulkhead frame, trim and doors.
- c. Reglazing of selected windows.

Div 7. Thermal and Moisture

- a. New shingle roofs with associated drainage mat, underlayment, metal flashing and trim.
- b. Patching of shingle siding.

Div 8. Doors and Windows Not Used

Div 9. Finishes

- a. Surface preparation and painting of new wood elements and existing trim as identified on drawings.
- b. Gutters and downspouts.
- c. Repaired portions of porticos and columns.
- d. Bulkhead walls, trim and doors.
- e. Touch up of existing surfaces affected by the Work.

Div 10. Specialties Not Used

Div 11. Mechanical Not Used

Div 12. Electrical Not Used

D. Examination of the site and Contract documents:

1. Each General Bidder shall visit the site of the proposed work and shall fully acquaint himself with the conditions as they exist so that he may fully understand and evaluate the facilities, difficulties and restrictions attending the execution of the work under this Contract.
2. A Pre-Bid Conference and Site Visit will be held at the front entrance of the Oliver House, Middleborough at a date and time stipulated Instruction for Bidders, Section 00 21 13.
3. No questions from Bidders will be accepted within 4 days excluding Saturday and Sunday of the Bid opening.
4. Bidders shall thoroughly examine and be familiar with the Drawings and Specifications. Each Bidder shall include in his bid any work required in connection with the same that has to be done by trades under his direct control.
5. Plans, surveys, measurements, calculations, estimates, and statements as to the conditions under which the work is to be performed are believed to be correct. Each bidder must satisfy himself by his own investigation and research to conditions affecting the work to be done and labor and material needed and make his bid in reliance thereon.
6. Before ordering any material or doing any work, all measurements shall be verified by the Contractor at the site. No extra charge or compensation will be allowed on account of the difference between actual dimensions and the measurements indicated on the Drawings. Any difference which may be found shall be submitted to the Designer for consideration before proceeding with the work.
7. The failure or omission of any bidder to receive or examine any form, instrument or document, or to visit the site and acquaint itself with the conditions there existing, shall in no way relieve any bidder from any obligation with respect to its bid.

1.6 FILED SUB-BIDS

A. None

1.7 WORK SEQUENCE

A. The Contractor shall arrange all his work schedules within the hours of 8:00 a.m. to 6:00 p.m. during the regular work week, unless approved by the Owner's Representative.

1.8 CONTRACTOR USE OF PREMISES

- A. The this is an historic property and many landscape elements are of historic interest. Contractor will be restricted to specified areas of the property for their use.
- B. The building is generally unoccupied however the Town may wish to operate the building and grounds for public events, Town will provide the Contractor with no less than two weeks advance notice prior to any such event. Contractor's time to clean the building and site, and make ready for any public event will be borne by the Town at a cost agreed to in advance of any event. Events currently planned include:
 - 1. None at this time.
- C. The Town maintains a collection of historic artifacts in the Oliver House. Interior work areas will be cleared for use by the Contractor. Contractor's access to the building's interior will be limited and coordination will be required with the Owner's Representative.
- D. Confine apparatus, storage of materials and construction operations to areas agreed to by the Owner's Representative. Do not unreasonably encumber the premises with materials.
- E. The Town can neither accept nor assume responsibility for the security of the Contractor's material or equipment; which is lost, stolen or vandalized. The Contractor is advised to exert caution in placement and storage of his equipment and material.
- F. WORK TO BE PERFORMED BY OWNER
 - 1. None

1.9 EMERGENCY PROCEDURES

- A. The Contractor shall thoroughly familiarize himself with Emergency Procedures and inform all subcontractors of same. These procedures will be explained at the pre-construction meeting.
- B. Emergencies:

In the event of an emergency on-site, telephone for emergency services (ambulance, fire department or police assistance):

 - 1. Telephone for emergency service.
 - 2. Make the scene safe.
 - 3. Render First-Aid if possible.
 - 4. Preserve evidence.
 - 5. Contact the appropriate outside agencies as required by law, including OSHA for multiple injuries (by Contractor), and DEP, NRC, etc.

1.10 FIELD ENGINEERING

- A. None required.

1.11 REFERENCE STANDARDS

- A. For products specified by association or trade standard, comply with requirements of the standard, except when more rigid requirements are specified or are required by applicable codes.

1.12 PRE-CONSTRUCTION CONFERENCE

- A. In accordance with the CONTRACT AND GENERAL CONDITIONS, a pre-construction conference to review the work will be conducted by the Town.

1.13 PROJECT MEETINGS

- A. Project meetings shall be held on a periodic basis subject to discretion of the Owner's Representative.

1.14 PERMITS, INSPECTION, AND TESTING REQUIRED BY GOVERNING AUTHORITIES

- A. The Contractor will be responsible to verify that there are not permits required for this project. In the event that any permits are required, the Town will waive all fees for these permits. The Contractor shall provide copies of all permits to the Project Manager and such Permits shall be displayed in a conspicuous location at the project site.

1.15 SAFETY, HEALTH AND ENVIRONMENTAL REGULATIONS

- A. In addition to provisions of the Contract and General Conditions, each General Contractor and subcontractor shall observe the following stipulations:
 - 1. Perform all work in accordance with federal and with Massachusetts Department of Labor and Industries safety and health standards and guidelines and provide a healthful and safe work conditions.
 - 2. All construction will comply strictly with the Massachusetts State Building Code.

1.16 PROTECTION & REPAIR OF NEW AND EXISTING FACILITIES, SURFACES, & UTILITIES

- A. The Contractor shall be responsible for exercising necessary care to avoid damage to Town property.
- B. The Contractor shall take precaution in execution of work for demolition of existing structures and materials not to disturb or damage any existing structures, landscaping, walks, roads, etc. scheduled to remain. The Contractor shall restore any damaged items to original condition and as directed by the Designer or Owner's Representative.
- C. Protect finished surfaces.
- D. In event of damage, promptly make replacements and repairs to the approval of the Project Designer and at no additional cost to the Town.

1.17 CONTRACT DOCUMENTS

- A. A reasonable number of sets of contract plans and specifications will be furnished by the Owner immediately after signing of the contract. If additional copies are required, the Contractor shall be responsible for obtaining additional copies and all associated costs.

1.18 DEFINITIONS

- A. Words in the singular shall also mean and include the plural, wherever the context so indicates, and words in the plural shall mean the singular, wherever the context so indicates.
- B. Wherever the terms "shown on drawings" are used in the specifications, they shall mean "noted", "indicated", "scheduled", "detailed", or shall refer to any other diagrammatic or written reference made on the drawings.
- C. Wherever the term "provide" is used in the specifications or on the drawings it will mean "furnish" and "install", "connect", "apply", "erect", "construct", or similar terms, unless otherwise indicated in the contract documents.
- D. Wherever the term "material" is used in the specifications it will mean any "product", "equipment", "device", "assembly", or "item" required under the Contract, as indicated by trade or brand name, manufacturer's name, standard specifications reference or to other description.
- E. The terms "approved" or "approval" shall mean the written approval of the Designer or Project Manager.
- F. The term "specifications" shall mean all information contained in the bound or unbound volume, including all "Contract Documents" defined herein, except for the drawings.
- G. "Concealed" means hidden from sight in chases, furred spaces, shafts, hung ceilings, embedded in construction or in crawl spaces.
- H. "Exposed" means not installed underground or "concealed" as defined above.
- I. "Architect" shall refer to Architect and/or Project Manager.
- J. "Designer" shall refer to the licensed professional designer of record for the project.
- K. "Hazardous Waste" shall refer to a waste, or combination of wastes, which because of its quantity, concentration, or physical, chemical or infectious characteristics may cause, or significantly contribute to an increase in serious irreversible, or incapacitating reversible illness or pose a substantial present or potential hazard to human health, safety, or welfare or to the environment when improperly treated, stored, transported, used or disposed of, or otherwise managed, however, not to include solid or dissolved materials in irrigation return flows or industrial discharges which are point sources subject to permits under section 402 of the Federal Water Pollution Control Act of 1967 as amended, or source, special nuclear, or by product material as defined by the Atomic Energy Act of 1954."

PART 3 - NOT USED

END OF SECTION 01 10 00

**SECTION 01 20 00
PRICE AND PAYMENT PROCEDURES**

1.1 GENERAL REQUIREMENTS

- A. Division 1, General Conditions, Supplementary General Conditions, the drawings, and all other parts of the Contract Documents are hereby made a part of this section.

1.2 SECTION INCLUDES

- A. Schedule of values.
- B. Applications for payment.
- C. Change procedures.
- D. Defect assessment.
- E. Unit Prices.
- F. Alternates

1.3 SCHEDULE OF VALUES

- A. Submit printed schedule on AIA Form G703 - Continuation Sheet for G702. Contractor's standard form or electronic media printout will be considered but must be approved by the Architect.
- B. Submit Schedule of Values in duplicate within 15 days after date of Owner-Contractor Agreement.
- C. Format: Utilize Table of Contents of this Project Manual. Identify each line item with number and title of major specification Section. Identify site mobilization, bonds and insurance.
- D. Include in each line item, amount of Allowances specified in this section.
- E. Include within each line item, direct proportional amount of Contractor's overhead and profit.
- F. Revise schedule to list approved Change Orders, with each Application For Payment.

1.4 APPLICATIONS FOR PAYMENT

- A. Submit three copies of each application on AIA Form G702 - Application and Certificate for payment and AIA G703 - Continuation Sheet for G702.
- B. Content and Format: Utilize Schedule of Values for listing items in Application for Payment.
- C. Submit updated construction schedule with each Application for Payment.

- D. Payment Period: Applications will be submitted monthly for review and approval by Architect. Payment period after approval: 20 days.
- E. Substantiating Data: When Architect requires substantiating information, submit data justifying dollar amounts in question. Include the following with Application for Payment:
 - 1. Construction progress schedules, revised and current.

1.5 CHANGE PROCEDURES

- A. Submittals: Submit name of individual authorized to receive change documents, and be responsible for informing others in Contractor's employ or Subcontractors of changes to the Work.
- B. The Architect will advise of minor changes in the Work not involving adjustment to Contract Sum/Price or Contract Time by issuing supplemental instructions on AIA Form G710.
- C. The Architect may issue a Proposal Request Notice of Change including a detailed description of proposed change with supplementary or revised Drawings and specifications, a change in Contract Time for executing the change. Contractor will prepare and submit estimate within 5 days.
- D. Contractor may propose changes by submitting a request for change to Architect, describing proposed change and its full effect on the Work. Include a statement describing reason for the change, and effect on Contract Sum/Price and Contract Time with full documentation and a statement describing effect on Work by separate or other Contractors. Document requested substitutions in accordance with Section 01600.
- E. Construction Change Directive: Architect may issue directive, on AIA Form G713 Construction Change Directive signed by Owner, instructing Contractor to proceed with change in the Work, for subsequent inclusion in a Change Order. Document will describe changes in the Work, and designate method of determining any change in Contract Sum/Price or Contract Time. Promptly execute change.
- F. Time and Material Change Order: Submit itemized account and supporting data after completion of change, within time limits indicated in Conditions of the Contract. In Time and Material Change Orders, the Contractor will be allowed a 15% markup for General Contractor work and 5% markup for Subcontractor work. Architect will determine change allowable in Contract Sum/Price and Contract Time as provided in Contract Documents.
- G. Maintain detailed records of work done on Time and Material basis. Provide full information required for evaluation of proposed changes, and to substantiate costs for changes in the Work.
- H. Document each quotation for change in cost or time with sufficient data to allow evaluation of quotation.
- I. Change Order Forms: AIA G701.
- J. Execution of Change Orders: Architect will issue Change Orders for signatures of parties as provided in Conditions of the Contract.

1.6 DEFECT ASSESSMENT

- A. Replace the Work, or portions of the Work, not conforming to specified requirements.
- B. If, in the opinion of the Architect it is not practical to remove and replace the Work, the Architect will direct appropriate remedy or adjust payment.
- C. The defective Work may remain, but unit sum/price will be adjusted to new sum/price at discretion of Owner.
- D. Defective Work will be partially repaired to instructions of Architect and unit sum/price will be adjusted to new sum/price at discretion of Owner.
- E. Individual specification sections may modify these options or may identify specific formula or percentage sum/price reduction.
- F. Authority of Architect to assess defects is final.
- G. The Authority of the Owner to identify payment adjustments is final.
- H. Non-Payment For Rejected Products: Payment will not be made for rejected products for any of the following:
 - 1. Products wasted or disposed of in a manner that is not acceptable.
 - 2. Products determined as unacceptable before or after placement.
 - 3. Products not completely unloaded from transporting vehicle.
 - 4. Products placed beyond lines and levels of required Work.
 - 5. Products remaining on hand after completion of the Work.
 - 6. Loading, hauling, and disposing of rejected products.
 - 7. Work.

**SECTION 01 30 00
ADMINISTRATIVE REQUIREMENTS**

PART 1 GENERAL

1.1 REQUIREMENTS

- A. Division 1, General Conditions, Supplementary General Conditions, the Drawings, and all other parts of the Contract Documents are hereby made a part of this Section.

1.2 SECTION INCLUDES

- A. Coordination and project conditions.
- B. Preconstruction meeting.
- C. Progress meetings.
- D. Cutting and patching.
- E. Special procedures.

1.3 COORDINATION AND PROJECT CONDITIONS

- A. The Owner may use the property for public events, including use of the land and structure. Owner will provide no less than two weeks notice of such events. Contractor may be required to clean the area to accommodate access to and use of specified areas around and within the building at a cost mutually agreed to.
- B. Verify utility requirements and characteristics of operating equipment are compatible with available utilities. Coordinate work of various sections having interdependent responsibilities for installing, connecting to, and placing in service, operating equipment.
- C. Coordinate completion and clean-up of Work of separate sections in preparation for Substantial Completion.
- D. Coordinate access to site for correction of defective Work and Work not in accordance with Contract Documents, to minimize disruption of Owner's activities.

1.4 PRECONSTRUCTION MEETING

- A. Owner will schedule meeting after Notice of Award.
- B. Attendance Required: Owner, Architect, Contractor, and representatives of the Oliver House.
- C. Agenda:
 - 1. Execution of Owner-Contractor Agreement.
 - 2. Submission of executed bonds and insurance certificates.
 - 3. Distribution of Contract Documents.
 - 4. Submission of list of Subcontractors, list of products, schedule of values, and progress schedule, including experience of field staff in their trades.

5. Designation of personnel representing parties in Contract, Filed Sub-Contractors, and Architect.
6. Procedures and processing of field decisions, submittals, substitutions, applications for payments, proposal request, Change Orders, and Contract closeout procedures.
7. Protection of existing work and site.
8. Scheduling.

1.5 PROGRESS MEETINGS

- A. Contractor will be available for meetings throughout progress of the Work at maximum bi-monthly intervals.
- B. Attendance Required: Job superintendent, Owner, Architect, as appropriate to agenda topics for each meeting.
- C. Agenda:
 1. Review minutes of previous meetings.
 2. Review of Work progress.
 3. Field observations, problems, and decisions.
 4. Identification of problems impeding planned progress.
 5. Review of submittals schedule and status of submittals.
 6. Review of off-site fabrication and delivery schedules.
 7. Maintenance of progress schedule.
 8. Corrective measures to regain projected schedules.
 9. Planned progress during succeeding work period.
 10. Coordination of projected progress.
 11. Maintenance of quality and work standards.
 12. Effect of proposed changes on progress schedule and coordination.
 13. Other business relating to Work.

PART 2 PRODUCTS

Not Used.

PART 3 EXECUTION

3.1 EXAMINATION

- A. Examine existing conditions prior to commencing work.

3.2 CUTTING AND PATCHING

- A. Employ skilled and experienced installer to perform cutting and patching.
- B. Execute cutting, fitting, and patching including excavation and fill, to complete Work, and to:
 1. Fit the several parts together, to integrate with other Work.
 2. Uncover Work to install or correct ill-timed Work.
 3. Remove and replace defective and non-conforming Work.
 4. Remove samples of installed Work for testing.

- 5. Provide openings in elements of Work for penetrations of mechanical and electrical Work.
- C. Execute work by methods to avoid damage to other Work, and to provide proper surfaces to receive patching and finishing.
- D. Cut masonry and concrete materials using masonry saw or core drill.
- E. Restore Work with new products in accordance with requirements of Contract Documents.
- F. Fit Work tight to pipes, sleeves, ducts, conduit, and other penetrations through surfaces.
- G. Maintain integrity of wall, ceiling, or floor construction; completely seal voids.
- H. Refinish surfaces to match adjacent finishes. For continuous surfaces, refinish to nearest intersection; for assembly, refinish entire unit.
- I. Identify hazardous substances or conditions exposed during the Work to Architect for decision or remedy.

3.3 SPECIAL PROCEDURES

- A. Protection of newly paved and striped parking area. Contractor is responsible to protect the existing parking area and will be required to return the lot in the present condition.
- B. Materials: As specified in product sections; match existing with new products for patching and extending work.
- C. Employ skilled and experienced installer to perform alteration work. Refer to individual Sections for required experience.
- D. Cut, move, or remove items as necessary for access to alterations and renovation Work. Replace and restore at completion.
- E. Remove unsuitable material not marked for salvage, including rotted wood, corroded metals, and deteriorated masonry and concrete. Replace materials as specified for finished Work.
- F. Remove debris and abandoned items from area and from concealed spaces.
- G. Prepare surface and remove surface finishes to permit installation of new work and finishes.
- H. Close openings in exterior surfaces to protect existing work from weather and extremes of temperature and humidity.
- I. Remove, cut, and patch Work in manner to minimize damage and to permit restoring products and finishes to original condition.
- J. Where new Work abuts or aligns with existing, provide smooth and even transition. Patch Work to match existing adjacent Work in texture and appearance.

- K. When finished surfaces are cut so that smooth transition with new Work is not possible, terminate existing surface along straight line at natural line of division and submit recommendation to Architect for review.
- L. Where change of plane of 1/4 inch or more occurs, submit recommendation for providing smooth transition; to Architect for review.
- M. Patch or replace portions of existing surfaces which are damaged, lifted, discolored, or showing other imperfections.
- N. Finish surfaces as specified in individual product sections.

END OF SECTION

SECTION 01 33 00 SUBMITTAL PROCEDURES

PART 1 GENERAL

1.1 GENERAL REQUIREMENTS

- A. Division 1, General Conditions, Supplementary General Conditions, the drawings, and all other parts of the Contract Documents are hereby made a part of this section.

1.2 SECTION INCLUDES

- A. Submittal procedures.
- B. Construction progress schedules.
- C. Proposed products list.
- D. Product data.
- E. Shop drawings.
- F. Test Reports
- G. Certificates.
- H. Manufacturer's instructions.

1.3 SUBMITTAL PROCEDURES

- A. Transmit each submittal with AIA Form G810 or Architect accepted form.
- B. Sequentially number transmittal forms. Mark revised submittals with original number and sequential alphabetic suffix.
- C. Identify Project, Contractor, subcontractor and supplier; pertinent drawing and detail number, and specification section number, appropriate to submittal.
- D. Apply Contractor's stamp, signed or initialed certifying that review, approval, verification of products required, field dimensions, adjacent construction Work, and coordination of information is in accordance with requirements of the Work and Contract Documents.
- E. Schedule submittals to expedite Project, and deliver to Architect at its business address. Coordinate submission of related items.
- F. For each submittal for review, allow 15 days excluding delivery time to and from Contractor.
- G. Identify variations from Contract Documents and product or system limitations which may be detrimental to successful performance of completed Work.
- H. Allow space on submittals for Contractor and Architect review stamps.

- I. When revised for resubmission, identify changes made since previous submission.
- J. Distribute copies of reviewed submittals as appropriate. Instruct parties to promptly report inability to comply with requirements.
- K. Submittals not requested will not be recognized or processed.

1.4 CONSTRUCTION PROGRESS SCHEDULES

- A. Submit preliminary outline Schedules in duplicate within 5 days after date of Owner-Contractor Agreement for coordination with Owner's requirements.
- B. Submit revised Progress Schedules in duplicate with each Application for Payment.
- C. Indicate estimated percentage of completion for each item of Work at each submission.
- D. Include submittal dates for shop drawings, product data, and samples, including Owner furnished products, and dates reviewed submittals will be required from Architect. Indicate decision dates for selection of finishes.
- E. Revisions To Schedules:
 - 1. Indicate progress of each activity to date of submittal, and projected completion date of each activity.
 - 2. Identify activities modified since previous submittal, major changes in scope, and other identifiable changes.

1.5 PROPOSED PRODUCTS LIST

- A. Within 5 days after date of Owner-Contractor Agreement, submit list of major products proposed for use, with name of manufacturer, trade name, and model number of each product.
- B. For products specified only by reference standards, give manufacturer, trade name, model or catalog designation, and reference standards.

1.6 PRODUCT DATA

- A. Product Data: Submit to Architect for review for limited purpose of checking for conformance with information given and design concept expressed in Contract Documents.
- B. Submit number of copies Contractor requires, plus two copies Architect will retain.
- C. Mark each copy to identify applicable products, models, options, and other data. Supplement manufacturers' standard data to provide information specific to this Project.
- D. After review, produce copies and distribute in accordance with SUBMITTAL PROCEDURES article and for record documents described in Section 01700.

1.7 SHOP DRAWINGS

- A. Shop Drawings: Submit to Architect for review for limited purpose of checking for conformance with information given and design concept expressed in Contract Documents.
- B. After review, produce copies and distribute in accordance with SUBMITTAL PROCEDURES article and for record documents described in Section 01700.

1.8 SAMPLES

- A. Samples: Submit to Architect for review for limited purpose of checking for conformance with information given and design concept expressed in Contract Documents.
- B. Samples For Selection as Specified in Product Sections:
 - 1. Submit to Architect for aesthetic, color, or finish selection.
 - 2. Submit samples of finishes from full range of manufacturers' standard colors, or in custom colors selected, textures, and patterns for Architect selection.
- C. Submit samples to illustrate functional and aesthetic characteristics of Products, with integral parts and attachment devices. Coordinate sample submittals for interfacing work.
- D. Include identification on each sample, with full Project information.
- E. Submit number of samples specified in individual specification sections; Architect will retain one sample.
- F. Reviewed samples which may be used in the Work are indicated in individual specification sections.

1.9 TEST REPORTS

- A. Submit for Architect's knowledge as contract administrator or for Owner.
- B. Submit test reports for information for limited purpose of assessing conformance with information given and design concept expressed in Contract Documents.

1.10 CERTIFICATES

- A. When specified in individual specification sections, submit certification by manufacturer, installation/application subcontractor, or Contractor to Architect, in quantities specified for Product Data.
- B. Indicate material or product conforms to or exceeds specified requirements. Submit supporting reference data, affidavits, and certifications as appropriate.
- C. Certificates may be recent or previous test results on material or Product, but must be acceptable to Architect.

1.11 MANUFACTURER'S INSTRUCTIONS

- A. When specified in individual specification sections, submit printed instructions for delivery, storage, assembly, installation, start-up, adjusting, and finishing, to Architect for delivery to Owner in quantities specified for Product Data.

- B. Indicate special procedures, perimeter conditions requiring special attention, and special environmental criteria required for application or installation.

PART 2 PRODUCTS

SECTION 01 40 00 QUALITY REQUIREMENTS

PART 1 GENERAL

1.1 REQUIREMENTS

- A. Division 1, General Conditions, Supplementary General Conditions, the Drawings, and all other parts of the Contract Documents are hereby made a part of this Section.

1.2 SECTION INCLUDES

- A. Quality control and control of installation.
- B. Tolerances
- C. References.
- D. Mock-up requirements.
- E. Testing and inspection services.
- F. Manufacturers' field services.
- G. Examination.
- H. Preparation.

1.3 QUALITY CONTROL AND CONTROL OF INSTALLATION

- A. Monitor quality control over suppliers, manufacturers, products, services, site conditions, and workmanship, to produce Work of specified quality.
- B. Comply with manufacturers' instructions, including each step in sequence.
- C. When manufacturers' instructions conflict with Contract Documents, request clarification from Architect before proceeding.
- D. Comply with specified standards as minimum quality for the Work except where more stringent tolerances, codes, or specified requirements indicate higher standards or more precise workmanship.
- E. Perform Work by persons qualified to produce required and specified quality.
- F. Verify field measurements are as indicated on Shop Drawings or as instructed by manufacturer.
- G. Secure products in place with positive anchorage devices designed and sized to withstand stresses, vibration, physical distortion, or disfigurement.

1.4 TOLERANCES

- A. Monitor fabrication and installation tolerance control of products to produce acceptable Work. Do not permit tolerances to accumulate.
- B. Comply with manufacturers' tolerances. When manufacturers' tolerances conflict with Contract Documents, request clarification from Architect before proceeding.
- C. Adjust products to appropriate dimensions; position before securing products in place.

1.5 REFERENCES

- A. For products or workmanship specified by association, trade, or other consensus standards, comply with requirements of standard, except when more rigid requirements are specified or are required by applicable codes.
- B. Conform to reference standard by date of issue current on date of Contract Documents, except where specific date is established by code.
- C. When specified reference standards conflict with Contract Documents, request clarification from Architect before proceeding.
- D. Neither contractual relationships, duties, nor responsibilities of parties in Contract nor those of Architect shall be altered from Contract Documents by mention or inference otherwise in reference documents.

PART 2 PRODUCTS

Not Used.

PART 3 EXECUTION

3.1 EXAMINATION

- A. Verify existing site conditions and substrate surfaces are acceptable for subsequent Work. Beginning new Work means acceptance of existing conditions.
- B. Verify existing substrate is capable of structural support or attachment of new Work being applied or attached.
- C. Examine and verify specific conditions described in individual specification sections.
- D. Verify utility services are available, of correct characteristics, and in correct locations.

3.2 PREPARATION

- A. Clean substrate surfaces prior to applying next material or substance.
- B. Seal cracks or openings of substrate prior to applying next material or substance.
- C. Apply manufacturer required or recommended substrate primer, sealer, or conditioner prior to applying new material or substance in contact or bond.

SECTION 01 50 00
TEMPORARY FACILITIES AND CONTROLS

PART 1 GENERAL

1.1 REQUIREMENTS

- A. Division 1, General Conditions, Supplementary General Conditions, the Drawings, and all other parts of the Contract Documents are hereby made a part of this Section.

1.2 SUMMARY

- A. Temporary Utilities: Electricity, lighting, heat, ventilation, water, and sanitary facilities.
- B. Temporary Controls: Barriers, enclosures and fencing, protection of the Work, and water control.
- C. Construction Facilities: Parking, storage, progress cleaning, and project signage.

1.4 TEMPORARY ELECTRICITY

- A. Cost: By Owner; connect to Owner's existing power service. Owner will pay cost of energy used. Exercise measures to conserve energy.
- B. If required, provide temporary electric feeder from existing building.
- C. Power Service Characteristics: single phase service, 110 volt available at the building.

1.5 TEMPORARY LIGHTING FOR CONSTRUCTION PURPOSES

- A. Maintain lighting and provide routine repairs.
- B. Permanent building lighting may be utilized during construction.

1.6 TEMPORARY HEATING

- A. Not available.

1.7 TEMPORARY VENTILATION

- A. Work is exclusively exterior so no Owner's ventilation facilities are required.

1.8 TEMPORARY WATER SERVICE

- A. Connect to existing water source for construction operations at time of project mobilization.
- B. Owner will pay cost of water used. Exercise measures to conserve water.
- C. Extend branch piping with outlets located so water is available by hoses with threaded connections.

1.9 TEMPORARY SANITARY FACILITIES

- A. Existing facilities may not be used during construction operations. Contractor may locate portable facilities on-site.

1.10 BARRIERS

- A. This building sits in a residential neighborhood and abuts a livestock area. Contractor to take the necessary effort to limit construction-related sound and dust to reasonable levels.
- B. Provide barriers to prevent unauthorized entry to construction areas, to allow for Owner's and DHRS's access to the Library building, and to protect existing facilities and adjacent properties from damage from construction operations and demolition.
- B. Provide barricades and covered walkways required by governing authorities.
- C. Protect non-owned vehicular traffic, stored materials, site, and structure from damage.

1.11 FENCING

- A. As required to maintain Contractor's security.

1.12 WATER CONTROL

- A. Maintain excavations free of water. Provide, operate, and maintain pumping equipment as required.
- B. Protect site from puddling or running water due to contractor operations.

1.13 EXTERIOR ENCLOSURES

- A. Not used.

1.14 PROTECTION OF INSTALLED WORK

- A. Protect installed Work and provide special protection where specified in individual specification sections.
- B. Provide temporary and removable protection for installed Products. Control activity in immediate work area to prevent damage.
- C. Provide protective coverings at walls, projections, jambs, sills, and soffits of openings.
- D. If Contractor's forces enter the Library building, protect finished floors, stairs, and other surfaces from traffic, dirt, wear, damage, or movement of heavy objects, by protecting with durable sheet materials.

1.15 SECURITY

- A. Provide security and facilities to protect Work, and existing facilities, and Owner's

operations from unauthorized entry, vandalism, or theft.

- B. Coordinate with Owner's security program.

1.16 PARKING AND STORAGE

- A. Arrange for surface parking areas to accommodate construction personnel.
- B. When site space is not adequate, provide additional off-site parking.
- C. The Owner shall make a site available for Contractor's storage of materials for the job. On site storage security shall be the responsibility of the Contractor.
- D. Do not place stored materials, drive vehicles or otherwise overload site areas where there is an underground water tank and septic system.

1.17 PROGRESS CLEANING AND WASTE REMOVAL

- A. Maintain the site in an orderly manner.
- B. Collect and remove waste materials, debris, and rubbish from site daily and dispose off-site.

1.18 REMOVAL OF UTILITIES, FACILITIES, AND CONTROLS

- A. Remove temporary utilities, equipment, facilities, materials, prior to Substantial Completion inspection.
- B. Clean and repair damage caused by installation or use of temporary work.
- C. Restore existing and permanent facilities used during construction to original condition. Restore permanent facilities used during construction to specified condition.

1.12 PROJECT SIGN

- A. Not required.

PART 2 PRODUCTS

Not Used.

PART 3 EXECUTION

Not Used.

END OF SECTION

THIS PAGE LEFT BLANK

SECTION 01 60 00 PRODUCT REQUIREMENTS

PART 1 GENERAL

1.1 REQUIREMENTS

- A. Division 1, General Conditions, Supplementary General Conditions, the Drawings, and all other parts of the Contract Documents are hereby made a part of this Section.

1.2 SECTION INCLUDES

- A. Products.
- B. Product delivery requirements.
- C. Product storage and handling requirements.
- D. Product options.
- E. Product substitution procedures.
- F. Equipment electrical characteristics and components.

1.3 PRODUCTS

- A. Furnish products of qualified manufacturers suitable for intended use. Furnish products of each type by single manufacturer unless specified otherwise.

1.4 PRODUCT DELIVERY REQUIREMENTS

- A. Transport and handle products in accordance with manufacturer's instructions.
- B. Promptly inspect shipments to ensure products comply with requirements, quantities are correct, and products are undamaged.
- C. Provide equipment and personnel to handle products by methods to prevent soiling, disfigurement, or damage.

1.5 PRODUCT STORAGE AND HANDLING REQUIREMENTS

- A. Store and protect products in accordance with manufacturers' instructions.
- B. Store with seals and labels intact and legible.
- C. Store sensitive products in weather tight, climate controlled, enclosures in an environment favorable to product.
- D. For exterior storage of fabricated products, place on sloped supports above ground.
- E. Provide bonded off-site storage and protection when site does not permit on-site storage or protection.

- F. Cover products subject to deterioration with impervious sheet covering. Provide ventilation to prevent condensation and degradation of products.
- G. Store loose granular materials on solid flat surfaces in well-drained area. Prevent mixing with foreign matter.
- H. Provide equipment and personnel to store products by methods to prevent soiling, disfigurement, or damage.
- I. Arrange storage of products to permit access for inspection. Periodically inspect to verify products are undamaged and are maintained in acceptable condition.

1.6 PRODUCT OPTIONS

- A. Products Specified by Reference Standards or by Description Only: Any product meeting those standards or description.
- B. Products Specified by Named Manufacturers: Products of one of manufacturers named and meeting specifications, no options or substitutions allowed.
- C. Products Specified by Named Manufacturers with Provision for Substitutions: Submit request for substitution for any manufacturer not named in accordance with the following article. No requests for substitution will be accepted during the bid period.

1.7 PRODUCT SUBSTITUTION PROCEDURES

- A. Substitutions may be considered when a product becomes unavailable through no fault of Contractor.
- B. Document each request with complete data substantiating compliance of proposed Substitution with Contract Documents.
- C. A request constitutes a representation that Contractor:
 - 1. Has investigated proposed product and determined that it meets or exceeds quality level of specified product.
 - 2. Will provide same warranty for Substitution as for specified product.
 - 3. Will coordinate installation and make changes to other Work which may be required for the Work to be complete with no additional cost to Owner.
 - 4. Waives claims for additional costs or time extension which may subsequently become apparent.
 - 5. Will reimburse Owner for review or redesign services associated with re-approval by authorities having jurisdiction.
- D. Substitutions will not be considered when they are indicated or implied on Shop Drawing or Product Data submittals, without separate written request, or when acceptance will require revision to Contract Documents.
- E. Substitution Submittal Procedure:
 - 1. Submit three copies of request for Substitution for consideration. Limit each request to one proposed Substitution.
 - 2. Submit Shop Drawings, Product Data, and certified test results attesting to proposed product equivalence. Burden of proof is on proposer.
 - 3. Architect will notify Contractor in writing of decision to accept or reject request.

- F. Substitutions may be approved on the basis of a change order, with associated changes in contract cost and time, at the discretion of the Owner.

PART 2 PRODUCTS

Not Used.

PART 3 EXECUTION

Not Used.

END OF SECTION

This Page Left Intentionally Blank

SECTION 01 70 00 EXECUTION REQUIREMENTS

PART 1 GENERAL

1.1 GENERAL PROVISIONS

- A. Division 1, General Conditions, Supplementary General Conditions, the Drawings, and all other parts of the Contract Documents are hereby made a part of this Section.

1.2 SECTION INCLUDES

- A. Substantial Completion.
- B. Final Acceptance.
- C. Punch List.
- D. Final cleaning.
- E. Protecting installed construction.
- F. Manual for materials and finishes.

1.3 SUBSTANTIAL COMPLETION

- A. Preliminary Procedures: Before requesting inspection for determining date of Substantial Completion, complete the following. List items below that are incomplete in request.
 - 1. Prepare a list of items to be completed and corrected (punch list), the value of items on the list, and reasons why the Work is not complete.
 - 2. Submit specific warranties, maintenance service agreements, final certifications, and similar documents as indicated below.
 - 3. Obtain and submit releases permitting Owner unrestricted use of the Work and access to services and utilities.
 - 4. Deliver tools, spare parts, extra materials, and similar items as indicated below. Label with manufacturer's name and model number where applicable.
 - 5. Terminate and remove temporary facilities from Project site, along with mockups, construction tools, and similar elements.
 - 6. Complete final cleaning requirements, including touchup painting.
 - 7. Touch up and otherwise repair and restore marred exposed finishes to eliminate visual defects.
- B. Inspection: Submit a written request for inspection for Substantial Completion. On receipt of request, Architect and Owner will either proceed with inspection or notify Contractor of unfulfilled requirements. Architect will notify Contractor of items, either on Contractor's list or additional items identified by Architect, that must be completed or corrected before certificate of completion will be issued. The time frame for the completion of the "punch list items" shall not exceed the

completion date of the contract. Should the "punch list items" not be completed within the specified time frame, the Owner may invoke the rights provided under the General Conditions.

1.4 FINAL ACCEPTANCE

- A. Preliminary Procedures: Before requesting final inspection for determining date of Final Completion, complete the following:
 - 1. Submit a final Application for Payment according to Section 01200 "Price and Payment Procedures."
- B. Inspection: Submit a written request for final inspection for acceptance. On receipt of request, Architect and Owner will either proceed with inspection or notify Contractor of unfulfilled requirements. Architect will prepare a final Certificate for Payment after inspection or will notify Contractor of construction that must be completed or corrected before certificate will be issued.
 - 1. Reinspection: Request reinspection when the Work identified in previous inspections as incomplete is completed or corrected. Contractor will compensate Owner for any additional charges submitted by Architect for reinspections.

1.5 LIST OF INCOMPLETE ITEMS (PUNCH LIST)

- A. Preparation: Submit two copies of list. Include name and identification of each space and area affected by construction operations for incomplete items and items needing correction including, if necessary, areas disturbed by Contractor that are outside the limits of construction.

1.6 FINAL CLEANING

- A. Execute final cleaning prior to final project assessment.
- B. Clean exterior glass, surfaces exposed to view; remove temporary labels, stains and foreign substances, polish transparent and glossy surfaces.
- C. Clean equipment and fixtures with cleaning materials appropriate to surface and material being cleaned.
- D. Do not paint over "UL" and similar labels, including mechanical and electrical nameplates.
- E. Wipe surfaces of mechanical and electrical equipment, and similar equipment. Remove excess lubrication, paint and mortar droppings, and other foreign substances.
- F. Clean site; sweep paved areas.
- G. Remove waste and surplus materials, rubbish, and construction facilities from site.

1.7 PROTECTING INSTALLED CONSTRUCTION

- A. Protect installed Work and provide special protection where specified in individual specification sections.
- B. Provide temporary and removable protection for installed products. Control activity in immediate work area to prevent damage.
- C. Provide protective coverings at walls, projections, jambs, sills, and soffits of openings.
- D. Protect finished floors, stairs, and other surfaces from traffic, dirt, wear, damage, or movement of heavy objects, by protecting with durable sheet materials.

1.8 MANUAL FOR MATERIALS AND FINISHES

- A. Submit two sets of final volumes within 10 days after final inspection.
- B. Building Products, Applied Materials, and Finishes: Include product data, with catalog number, size, composition, and color and texture designations. Include information for re-ordering custom manufactured products.
- C. Instructions for Care and Maintenance: Include manufacturer's recommendations for cleaning agents and methods, precautions against detrimental agents and methods, and recommended schedule for cleaning and maintenance.
- D. Moisture Protection and Weather Exposed Products: Include product data listing applicable reference standards, chemical composition, and details of installation. Include recommendations for inspections, maintenance, and repair.
- E. Additional Requirements: As specified in individual product specification sections.
- F. Include listing in Table of Contents for design data, with tabbed fly sheet and space for insertion of data.

PART 2 PRODUCTS

**SECTION 02 06 20
EXISTING BUILDING CONDITIONS**

1. GENERAL PROVISIONS

- A. The Conditions of the Contract and other Sections of Division I, General Requirements apply to this section.

2. EXISTING CONDITIONS

- A. Before submitting a bid, the Contractor shall make a thorough examination of the conditions at the site, checking the requirements of the Plans and Specifications with the existing conditions.
- B. No claim for extra compensation or extension of time will be allowed on account of the Contractor's failure to estimate properly the quantities, locations, and measurements of all items required to complete the work which could be discerned from visiting the site.
- C. The Contractor shall report any discrepancies to the Architect and request an interpretation.

3. SUBSURFACE DATA

- A. This building is served by underground & overhead utilities and construction involves work in and around those utilities.
- B. It is the contractor's responsibility to locate and protect existing utilities on the site.

4. EXISTING BUILDINGS

- A. Drawings and details from the original construction drawings and previous completed renovation projects were consulted in the preparation of these documents.
- B. Not all conditions and construction details pertinent to the completion of this project are confirmed. Discrepancies uncovered during the course of the work are to be reported to the Architect for determination of methods to proceed as soon as they are uncovered or revealed.
- C. Testing for hazardous materials has not been performed on the work area.
- D. Photographs of the existing buildings are on the accompanying page for general reference. Nothing herein shall change the responsibility of the contractor to be familiar with the
 - 1. Existing conditions in preparation of their bids.

END OF SECTION

**SECTION 02 41 09
SELECTIVE STRUCTURE DEMOLITION**

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

- A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and Division 01 Specification Sections, apply to this Section.

1.2 SUMMARY

- A. Section Includes:

1. Demolition and removal of selected portions of building or structure:
 - a. Demolishing designated building equipment and fixtures.
 - b. Demolishing designated construction.
 - c. Cutting and alterations for completion of the Work.
 - d. Removing designated items for reuse.
 - e. Protecting items designated to remain.
 - f. Removing demolished materials.

- B. Related Requirements:

1. Division 01 Section "Summary" for restrictions on the use of the premises, Owner-occupancy requirements, and phasing requirements.
2. Division 01 Section "Execution" for cutting and patching procedures.

1.3 DEFINITIONS

- A. Remove: Detach items from existing construction and legally dispose of them off-site unless indicated to be removed and recycled.

1.4 MATERIALS OWNERSHIP

- A. Unless otherwise indicated, demolition waste becomes property of Contractor.

1.5 PREINSTALLATION MEETINGS

- A. Predemolition Conference: Conduct conference at **Project site**.

1. Inspect and discuss condition of construction to be selectively demolished.
2. Review structural load limitations of existing structure.

3. Review and finalize selective demolition schedule and verify availability of materials, demolition personnel, equipment, and facilities needed to make progress and avoid delays.
4. Review requirements of work performed by other trades that rely on substrates exposed by selective demolition operations.
5. Review areas where existing construction is to remain and requires protection.
6. Review testing for adhesive compatibility.

1.6 INFORMATIONAL SUBMITTALS

- A. Proposed Protection Measures: Submit report, including drawings, that indicates the measures proposed for protecting individuals and property, **for environmental protection, for dust control and, for noise control**. Indicate proposed locations and construction of barriers.
- B. Schedule of Selective Demolition Activities: Indicate the following:
 1. Detailed sequence of selective demolition and removal work, with starting and ending dates for each activity. Ensure Owner's on-site operations are uninterrupted.
 2. Interruption of utility services. Indicate how long utility services will be interrupted.
 3. Coordination for shutoff, capping, and continuation of utility services.
 4. Use of elevator and stairs.
 5. Coordination of Owner's continuing occupancy of portions of existing building and of Owner's partial occupancy of completed Work.
- C. Inventory: Submit a list of items to be removed and salvaged and deliver to Owner prior to start of demolition.
- D. Predemolition Photographs or Video: Submit before Work begins.

1.7 QUALIFICATIONS

- A. Qualifications of Trade: This is an historic building and all work must be performed per the Secretary of the Interior's Standards of Historic Preservation. Work under this section must be performed by companies who can demonstrate more than five years specialized experience working on the controlled partial demolition of preservation and/or restoration projects on historic properties.
- B. Field staff: Project superintendent or foreman shall have a minimum of five years documented experience with work of this type and all installers on the job shall have a minimum of three years documented experience in work of this type and documented experience with three projects listed on the National Register of Historic Places.
- C. **Contractor will be held strictly responsible for excessive demolition or unnecessary removal of historic fabric as determined by the Architect.**

1.8 CLOSEOUT SUBMITTALS

- A. Inventory: Submit a list of items that have been removed and recycled.

- B. Landfill Records: Indicate receipt and acceptance of hazardous wastes by a landfill facility licensed to accept hazardous wastes.

1.9 FIELD CONDITIONS

- A. Conditions existing at time of inspection for bidding purpose will be maintained by Owner as far as practical.
- B. Notify Architect of discrepancies between existing conditions and Drawings before proceeding with selective demolition.
- C. Hazardous Materials: It is not expected that hazardous materials will be encountered in the Work.
 - 1. If any suspected hazardous materials of any sort are encountered, do not disturb; immediately notify Architect and Owner.
- D. Protection Areas: Demolition and hauling equipment and other materials shall be of sizes that clear surfaces with in spaces, areas, rooms, and openings, including temporary protection, by **12 inches** or more.
- E. Storage or sale of removed items or materials on-site is not permitted.
- F. Utility Service: Maintain existing utilities indicated to remain in service and protect them against damage during selective demolition operations.
 - 1. Maintain fire-protection facilities in service during selective demolition operations.

1.10 WARRANTY

- A. Existing Warranties: Remove, replace, patch, and repair materials and surfaces cut or damaged during selective demolition, by methods and with materials so as not to void existing warranties. Notify warrantor before proceeding. Existing warranties include the following:
 - 1. None anticipated.
- B. Notify warrantor on completion of selective demolition, and obtain documentation verifying that existing system has been inspected and warranty remains in effect. Submit documentation at Project closeout.

PART 2 - PRODUCTS

2.1 PERFORMANCE REQUIREMENTS

- A. Regulatory Requirements: Comply with governing EPA notification regulations before beginning selective demolition. Comply with hauling and disposal regulations of authorities having jurisdiction.
- B. Standards: Comply with ANSI/ASSE A10.6 and NFPA 241.

PART 3 - EXECUTION

3.1 EXAMINATION

- A. Verify that utilities have been protected or disconnected and capped before starting selective demolition operations.
- B. Review record documents of existing construction provided by Owner. Owner does not guarantee that existing conditions are same as those indicated in record documents.
- C. Survey existing conditions and correlate with requirements indicated to determine extent of selective demolition required.
- D. When unanticipated mechanical, electrical, or structural elements that conflict with intended function or design are encountered, investigate and measure the nature and extent of conflict. Promptly submit a written report to Architect.
- E. Survey of Existing Conditions: Record existing conditions by use of **preconstruction photographs** and **preconstruction videotapes**.
 - 1. Comply with requirements specified in Division 01 Section "Photographic Documentation."
 - 2. Inventory and record the condition of items to be removed and salvaged. Provide **photographs or video** of conditions that might be misconstrued as damage caused by salvage operations.
 - 3. Before selective demolition or removal of existing building elements that will be reproduced or duplicated in final Work, make permanent record of measurements, materials, and construction details required to make exact reproduction.

3.2 UTILITY SERVICES AND MECHANICAL/ELECTRICAL SYSTEMS

- A. Existing Services/Systems to Remain: Maintain services/systems indicated to remain and protect them against damage.
 - 1. Comply with requirements for existing services/systems interruptions specified in Division 01 Section "Summary."
- B. Existing Services/Systems to Be Removed, Relocated, or Abandoned: Locate, identify, disconnect, and seal or cap off indicated utility services and mechanical/electrical systems serving areas to be selectively demolished.
 - 1. Owner will arrange to shut off indicated services/systems when requested by Contractor.
 - 2. Arrange to shut off indicated utilities with utility companies.
 - 3. If services/systems are required to be removed, relocated, or abandoned, provide temporary services/systems that bypass area of selective demolition and that maintain continuity of services/systems to other parts of building.
 - 4. Disconnect, demolish, and remove fire-suppression systems and HVAC systems, equipment, and components indicated to be removed.
 - a. Piping to Be Removed: Remove portion of piping indicated to be removed and cap or plug remaining piping with same or compatible piping material.

- b. Piping to Be Abandoned in Place: Drain piping and cap or plug piping with same or compatible piping material.
- c. Equipment to Be Removed: Disconnect and cap services and remove equipment.
- d. Equipment to Be Removed and Reinstalled: Disconnect and cap services and remove, clean, and store equipment; when appropriate, reinstall, reconnect, and make equipment operational.
- e. Equipment to Be Removed and Salvaged: Disconnect and cap services and remove equipment and deliver to Owner.
- f. Ducts to Be Removed: Remove portion of ducts indicated to be removed and plug remaining ducts with same or compatible ductwork material.
- g. Ducts to Be Abandoned in Place: Cap or plug ducts with same or compatible ductwork material.

3.3 PREPARATION

- A. Site Access and Temporary Controls: Conduct selective demolition and debris-removal operations to ensure minimum interference with roads, streets, walks, walkways, and other adjacent occupied and used facilities.
 - 1. Comply with requirements for access and protection specified in Division 01 Section "Temporary Facilities and Controls."
- B. Temporary Facilities: Provide temporary barricades and other protection required to prevent injury to people and damage to adjacent buildings and facilities to remain.
 - 1. Provide protection to ensure safe passage of people around selective demolition area and to and from occupied portions of building.
 - 2. Protect walls, ceilings, floors, and other existing finish work that are to remain or that are exposed during selective demolition operations.
 - 3. Cover and protect furniture, furnishings, and equipment that have not been removed.
 - 4. Comply with requirements for temporary enclosures, dust control, heating, and cooling specified in Division 01 Section "Temporary Facilities and Controls."
- C. Temporary Shoring: Provide and maintain shoring, bracing, and structural supports as required to preserve stability and prevent movement, settlement, or collapse of construction and finishes to remain, and to prevent unexpected or uncontrolled movement or collapse of construction being demolished.
 - 1. Strengthen or add new supports when required during progress of selective demolition.

3.4 SELECTIVE DEMOLITION, GENERAL

- A. General: Demolish and remove existing construction only to the extent required by new construction and as indicated. Use methods required to complete the Work within limitations of governing regulations and as follows:
 - 1. Proceed with selective demolition systematically, from higher to lower level. Complete selective demolition operations above each floor or tier before disturbing supporting members on the next lower level.
 - 2. Neatly cut openings and holes plumb, square, and true to dimensions required. Use cutting methods least likely to damage construction to remain or adjoining construction.

Use hand tools or small power tools designed for sawing or grinding, not hammering and chopping, to minimize disturbance of adjacent surfaces. Temporarily cover openings to remain.

3. Cut or drill from the exposed or finished side into concealed surfaces to avoid marring existing finished surfaces.
 4. Do not use cutting torches until work area is cleared of flammable materials. At concealed spaces, such as duct and pipe interiors, verify condition and contents of hidden space before starting flame-cutting operations. Maintain portable fire-suppression devices during flame-cutting operations.
 5. Maintain adequate ventilation when using cutting torches.
 6. Remove decayed, vermin-infested, or otherwise dangerous or unsuitable materials and promptly dispose of off-site.
 7. Remove structural framing members and lower to ground by method suitable to avoid free fall and to prevent ground impact or dust generation.
 8. Locate selective demolition equipment and remove debris and materials so as not to impose excessive loads on supporting walls, floors, or framing.
 9. Dispose of demolished items and materials promptly.
- B. Existing Items to Remain: Protect construction indicated to remain against damage and soiling during selective demolition. When permitted by Architect, items may be removed to a suitable, protected storage location during selective demolition and cleaned and reinstalled in their original locations after selective demolition operations are complete.

3.5 SELECTIVE DEMOLITION PROCEDURES FOR SPECIFIC MATERIALS

- A. Concrete: Demolish in small sections. Using power-driven saw, cut concrete to a depth of at least 3/4 inch (19 mm) at junctures with construction to remain. Dislodge concrete from reinforcement at perimeter of areas being demolished, cut reinforcement, and then remove remainder of concrete. Neatly trim openings to dimensions indicated.
- B. Concrete: Demolish in sections. Cut concrete full depth at junctures with construction to remain and at regular intervals using power-driven saw, then remove concrete between saw cuts.

3.6 DISPOSAL OF DEMOLISHED MATERIALS

- A. General: Except for items or materials indicated to be recycled, reused, salvaged, reinstalled, or otherwise indicated to remain Owner's property, remove demolished materials from Project site and legally dispose of them in an EPA-approved landfill.
1. Do not allow demolished materials to accumulate on-site.
 2. Remove and transport debris in a manner that will prevent spillage on adjacent surfaces and areas.
 3. Remove debris from elevated portions of building by chute, hoist, or other device that will convey debris to grade level in a controlled descent.
 4. Comply with requirements specified in Division 01 Section "Construction Waste Management and Disposal."
- B. Burning: Do not burn demolished materials.
- C. Burning: Not allowed!

D. Disposal: Transport demolished materials off Owner's property and legally dispose of them.

3.7 CLEANING

A. Clean adjacent structures and improvements of dust, dirt, and debris caused by selective demolition operations. Return adjacent areas to condition existing before selective demolition operations began.

3.8 SELECTIVE DEMOLITION SCHEDULE

A. Existing Construction to Be Removed:

1. Paving stones as indicated on drawings.
2. Clapboard sections designated in field.
3. Bulkhead doors and frame.
4. Trellises as indicated on drawings.
5. Cornerboard sections designated on the drawings.
6. Cornice, fascia, soffit and gutter sections designated on the drawings.
7. Existing window shutters as indicated on drawings.
8. Roofing, flashing and damaged roof deck.
9. Wood shingle and plank siding as indicated on drawings.
10. Window glazing as indicated on drawings.
11. Downspouts as indicated on drawings.
12. Portions of chimneys as indicated on drawings.

B. Existing Items to Remain:

1. As indicated on drawings.

END OF SECTION 02 41 09

THIS PAGE LEFT INTENTIONALLY BLANK

**SECTION 04 01 00
MAINTENANCE OF MASONRY**

PART 1 GENERAL

1.1 REQUIREMENTS

A. Division 1, General Conditions, Supplementary General Conditions, the Drawings, and all other parts of the Contract Documents are hereby made a part of this Division.

B. Attention is directed to the CONTRACT AND GENERAL CONDITIONS and all Sections within DIVISION 1 - GENERAL REQUIREMENTS, which are hereby made a part of this section of the specifications.

1.2 SUMMARY

A. Repoint Foundation.

B. Repoint deteriorated chimneys and rebuild chimney cap.

1.3 RELATED SECTIONS

A. Section 01 40 00 – Quality Control

B. Section 01 70 00 – Final Cleaning

C. Section 02 41 00 – Selective Demolition

D. Section 04 10 00 – Mortar and Masonry Grout

E. Section 07 90 00 - Joint Sealers

1.4 REFERENCES

A. ACI 530 - Building Code Requirements for Masonry Structures.

B. ACI 530.1 - Specifications For Masonry Structures.

C. ASTM C62 - Standard Specification for Building Brick (Solid Masonry Units Made From Clay or Shale).

D. ASTM C216 - Standard Specification for Facing Brick (Solid Masonry Units Made from Clay or Shale).

E. IMIAC - International Masonry Industry All-Weather Council: Recommended Practices and Guide Specification for Cold Weather Masonry Construction.

F. IMIAC - International Masonry Industry All-Weather Council: Recommended Practices and Guide Specification for Hot Weather Masonry Construction.

G. ASTM C404 - Aggregates for Masonry Grouts.

H. ASTM C882 - Bond Strength of Epoxy Resin Systems Used with Concrete.

1.5 SUBMITTALS

A. Submit under provisions of Section 01 30 00.

B. Product Data: Submit product standards, physical and chemical characteristics, technical specifications, limitations, maintenance instructions, and general recommendations regarding each material.

C. Manufacturer's Instructions: Submit mixing instructions.

D. Manufacturer's Certificate: Certify that products meet or exceed specified requirements.

E. Samples: Submit two color samples for each mortar color patch that will be exposed to view and must match existing.

F. Samples: Submit samples of full color range of selected mortar materials.

1.6 QUALITY ASSURANCE

A. Perform Work in accordance with ACI 530 and ACI 530.1.

B. Maintain one copy of each document on site.

1.7 QUALIFICATIONS

A. Qualifications of Trade: This is an historic building and all work must be performed per the Secretary of the Interior's Standards of Historic Preservation. Work under this section must be performed by companies who can demonstrate more than five years specialized experience working on masonry restoration and repointing projects.

B. Field staff: Project superintendent or foreman shall have a minimum of five years documented experience with work of this type and all installers on the job shall have a minimum of three years documented experience in work of this type and documented experience with three projects listed on the National Register of Historic Places.

1.8 MOCKUP

A. Clean a single length of coping to determine extent of cleaning.

B. Locate where directed by Architect.

C. Repair one area for each different type of brick or stone masonry repair for reviewing and the establishment of a quality standard, when acceptable to the Architect.

D. Coping section and method of procedure, when acceptable to the Architect, will become the standard for work of this section.

E. Craftsman employed for work of mockup shall be same as those who undertake the work of this contract.

1.9 DELIVERY, STORAGE, AND HANDLING

A. Deliver, store, protect, and handle products to site under provisions of Section 01 60 00.

1.10 PROTECTION

A. Protect elements surrounding the work of this section from damage or disfiguration.

B. Immediately remove stains, efflorescence, or other excess resulting from the work of this section.

1.11 ENVIRONMENTAL REQUIREMENTS

A. Maintain materials and surrounding air temperature to minimum 50 degrees F prior to, during, and 48 hours after completion of masonry work.

B. Maintain materials and surrounding air temperature to maximum 90 degrees F prior to, during, and 48 hours after completion of masonry work.

C. Do not sandblast.

1.12 SEQUENCING

A. Perform repointing after cleaning masonry surfaces.

1.13 SCHEDULING

- A. Schedule work under the provisions of Section 01 30 00.

PART 2 PRODUCTS

2.1 MORTAR MATERIALS

- A. Conform to requirements of Section 04 10 00.

2.2 MASONRY MATERIALS

- A. Face Brick: ASTM C216, Type FBS, Grade SW; waterstruck, color to match existing.
- B. Building Brick: ASTM C62, Grade SW; solid units.
- C. Brick Size and Shape: Nominal size to match existing. Furnish special units for 90 degree corners, corbels and recessed panels.

PART 3 EXECUTION

3.1 EXAMINATION

- A. Section 01 30 00 - Administrative Requirements: Coordination and project conditions.
- B. Verify that surfaces are ready to receive work of this section.
- C. Beginning of installation means acceptance of existing surfaces or substrate.

3.2 PREPARATION

- A. Clean masonry, stone and stone surfaces of dirt, laitance, corrosion, or other contamination; bristle brush using water; rinse surface and allow to dry.
- B. Flush out cracks and voids with water to remove laitance and dirt.
- C. Carefully remove and store for reuse any brick or stone sections requiring removal for execution of the Work.
- D. Mask landscaping and surfaces not receiving work of this section to protect from damage.

3.3 REBUILDING

- A. Cut out damaged and deteriorated stone and masonry with care in a manner to prevent damage to any adjacent remaining materials. Shore as necessary for large section rebuilds or structural piers or arches.
- B. Cut away loose or unsound adjoining mortar and stone to provide firm and solid bearing for new work.

Rebuild utilizing reclaimed masonry units or new matching units and reclaimed stone (preferred) or new matching stone units following procedures for new work specified in Section 04 10 00.

- C. Mortar Mix: Colored and proportioned as specified in Section 04 10 00.

D. Install built in masonry work to match and align with existing, with joints and coursing true and level, faces plumb and in line. Build in all openings, accessories and fittings.

E. Chipping hammers or other power tools will not be permitted under work of this section with the exception of power grinders and saws as approved by the Architect.

3.4 REPOINTING

A. Remove loose mortar, rake out remaining mortar in joints between two inch (minimum) and two and one half times (maximum) the joint thickness (approximately 1" for 3/8" joint) depth or until sound mortar is reached.

B. Use of power tools is permitted for horizontal joints only with a blade 1/3 the thickness of the joint to cut the middle third of the joint, raking out the remaining material by hand after demonstrated use in approved mockup panel. Vertical joints must be raked out by hand utilizing chisel with a thickness no more than one half (1/2x) the thickness of the joint (approximately 3/16" for a 3/8" joint).

C. Reset and rebuild masonry section prior to refilling the prepared joints.

D. Do not damage masonry units.

E. When cutting is complete, remove dust and loose material by brushing.

F. Premoisten joint and apply mortar specified in Section 041000. Pack tightly in maximum 1/4 inch layers. Form a smooth, compact joint to tooled to match existing joints for profile and depth from brick face.

G. Moist cure for 72 hours.

3.5 CLEANING MASONRY

A. Cleaning Detergent: None to be used. Brush clean brick and manufactured stone masonry surfaces with clean water and flush loose mortar and dirt to clean after repointing and/or rebuilding work.

B. Cleaning of masonry other than for cleanup after repointing or rebuilding is not a part of this contract.

3.6 AGEING

A. Rub in new repointing work to match, as close as possible, adjacent original work.

B. Use carbon black in small amounts, rubbing in well with medium bristle brush.

C. After each application, dust off surplus and wash down with low pressure hose. Allow surface to dry before proceeding with succeeding applications.

D. Continue process until acceptance.

3.7 CLEANING

A. As work proceeds and upon completion of each portion of the Work, remove excess mortar, smears, droppings.

B. Clean all surrounding surfaces to the Work in accord with 3.5 above.

3.8 SCHEDULE

A. Brick Walls:

1. Repoint as indicated on drawings.
2. Cleaning shall not be required for brick walls except as detailed in 3.5 above.

3.9 FIELD QUALITY CONTROL

A. Section 01 40 00 - Quality Requirements: Testing and Inspection Services

B. Section 01 70 00 - Execution Requirements: Testing, adjusting, and balancing.

END OF SECTION

This page left blank

SECTION 04 10 00 MORTAR AND MASONRY GROUT

PART 1 GENERAL

1.1 REQUIREMENTS

A. Division 1, General Conditions, Supplementary General Conditions, the Drawings, and all other parts of the Contract Documents are hereby made a part of this Division.

1.2 SUMMARY

- A. Mortar for repointing stone foundation.
- B. Brick masonry mortar for repointing and rebuilding chimneys.

1.3 RELATED SECTIONS

- A. Section 01 40 00 - Quality Control
- B. Section 01 70 00 – Project Closeout
- C. Section 02 41 00 - Selective Demolition.
- D. Section 04 01 00 – Maintenance of Masonry

1.4 REFERENCES

- A. NPS Preservation Brief #2 Repointing Mortar Joints in Historic Masonry Buildings
- B. ACI 530 - Building Code Requirements for Masonry Structures.
- C. ASTM C91 - Masonry Cement.
- D. ASTM C94 - Ready-Mixed Concrete.
- E. ASTM C144 - Aggregate for Masonry Mortar.
- F. ASTM C150 - Portland Cement.
- G. ASTM C207 - Hydrated Lime for Masonry Purposes.
- H. ASTM C270 - Mortar for Unit Masonry.
- I. ASTM C387 - Packaged, Dry, Combined Materials, for Mortar and Concrete.
- J. ASTM C404 - Aggregates for Masonry Grout.
- K. ASTM C476 - Grout for Masonry.
- L. ASTM C780 - Preconstruction and Construction Evaluation of Mortars for Plain and Reinforced Unit Masonry.
- M. ASTM C1019 - Method of Sampling and Testing Grout.
- N. ASTM C1072 - Method for Measurement of Masonry Flexural Bond Strength.
- O. ASTM C1142 - Ready-Mixed Mortar for Unit Masonry.
- P. IMIAC (International Masonry Industry All-Weather Council) - Recommended Practices and Guide Specifications for Cold Weather Masonry Construction.
- Q. IMIAC (International Masonry Industry All-Weather Council) - Recommended Practices and Guide Specifications for Hot Weather Masonry Construction.

1.5 SUBMITTALS

- A. Submit under provisions of Section 013000.
- B. Include design mix, indicate whether the Proportion or Property specification of ASTM C270 is to be used, required environmental conditions, and admixture limitations.
- C. Samples: Submit two samples of mortar for every color, illustrating mortar color and color range.

- 1.6 QUALITY ASSURANCE
 - A. Perform Work in accordance with ACI 530 and ACI 530.1.
 - B. Repointing work shall be judged for quality by comparison with mockup panel described below.
 - C. Installer: Project superintendent or foreman shall have a minimum of five years documented experience with work of this type and all installers on the job shall have a minimum of three years documented experience in work of this type and documented experience with three projects listed on the National Register of Historic Places.

- 1.7 MOCK UP
 - A. Create test panel for each mortar color and brick configuration using portion of existing wall (panel can remain in place once accepted).
 - B. Mockup shall demonstrate the tooling, consolidation and color of the mortar work.
 - C. Architect shall be sole judge of acceptability of the mockup panel.
 - D. The accepted mockup shall remain in place for the duration of the job and shall serve as the standard of workmanship against which all mortar and pointing work shall be judged for quality and match.
 - E. Mockup shall be performed only by workman who shall be employed to undertake the actual pointing and masonry work.

- 1.8 DELIVERY, STORAGE, AND HANDLING
 - A. Maintain packaged materials clean, dry, and protected against dampness, freezing, and foreign matter.

- 1.9 ENVIRONMENTAL REQUIREMENTS
 - A. Maintain materials and surrounding air temperature to minimum 50 degrees F prior to, during, and 48 hours after completion of masonry work.
 - B. Maintain materials and surrounding air temperature to maximum 90 degrees F prior to, during, and 48 hours after completion of masonry work.
 - C. No work shall be installed when the ambient air temperature is lower than 50 degrees F or higher than 90 degrees F.

PART 2 PRODUCTS

- 2.1 MATERIALS
 - A. Colored Masonry Cement:
 - 1. "Colorbond Custom Color Masonry Cement," Centurion.
 - 2. "Atlas Custom Color Masonry Cement," Lehigh Portland Cement Co.
 - 3. "Flamingo Color Masonry Cement," The Riverton Corporation.
 - B. Portland Cement: ASTM C150, Type I, white color, non staining without air entrainment.
 - C. Mortar Aggregate
 - 1. Foundation
 - a. 100% passing sieve size 10
 - b. 50% passing sieve size 30
 - c. 35% passing sieve size 50
 - d. 15% passing sieve size 100
 - 2. Main Chimneys
 - 3. Rear Chimney

- D. ASTM C144, standard masonry type.
- E. Colorant: SGS.
- F. Hydrated Lime: ASTM C207, Type N.
- G. Grout Fine Aggregate: clean, well graded sand of medium to fine particle size, to be Pirolli's Silica Sand 2040 or "loose mason's sand."
- H. Water: Clean and potable.

2.2 MORTAR COLOR

- A. Light Buff Mortar: SGS 10 A, type N
- B. Golden Brown Mortar: SGS 32H, type N
- C. Light Brown Mortar: SGS 30H, type N

2.3 ADMIXTURES

- A. Not allowed.

2.4 MORTAR MIXES

- A. Foundation
 - 1. One unit white Portland cement
 - 2. Two units Type S hydrated lime
 - 3. Golden Brown color SGS or Lansco
 - 4. 6-7 units of sand
- B. Main Chimneys
 - 1. One unit white Portland cement
 - 2. One unit Type S hydrated lime
 - 3. Light Buff color SGS or Lansco
 - 4. 7-10 units of sand
- C. Kitchen Chimney
 - 1. One unit white Portland cement
 - 2. One unit Type S hydrated lime
 - 3. Light Brown color SGS or Lansco
 - 4. 6-7 units of sand.

D. Pointing Mortar: ASTM C270, Type N using the Property specification (average compressive strength at 28 days 750 psi, 75% water retention, 14% air content).

2.5 MORTAR MIXING

- A. Thoroughly mix mortar ingredients in accordance with ASTM C270 in quantities needed for immediate use.
- B. Maintain sand uniformly damp immediately before the mixing process.
- C. Provide uniformity of mix and coloration.
- D. Do not use anti-freeze compounds to lower the freezing point of mortar.
- E. If water is lost by evaporation, re-temper only within two hours of mixing.
- F. Use mortar within two hours after mixing at temperatures of 90 degrees F, or two-and-one-half hours at temperatures under 50 degrees F.
- G. No work shall be installed when the ambient air temperature is lower than 50 degrees F or higher than 90 degrees F.
- H. No air entraining shall be allowed.

2.6 MIX TESTS

- A. Test mortar in accordance with Section 014000.
- B. Testing of Mortar Mix: In accordance with ASTM C270.

- C. Lay up test sections for color match. Architect shall make the final decision on color match.

PART 3 EXECUTION

3.1 PREPARATION

- A. Plug clean-out holes with similar materials to surface being worked on.

3.2 INSTALLATION

- A. See paragraphs 3.4 and 3.5 of Section 040100 Maintenance of Masonry for detailed execution requirements
- B. Install mortar in accordance with manufacturer's instructions.
- C. Strike joints to match existing tooling.
 - 1. Field stone foundations: recessed to allow fieldstone shapes to stand proud, no special tooling.
 - 2. Main House Chimneys: slightly recessed at bottom, "weatherstruck"
 - 3. Kitchen Chimney: smooth, slightly concave
- D. Joint size to match existing.

3.3 FIELD QUALITY CONTROL

- A. Field inspection and testing will be performed under provisions of Section 014000.
- B. Test and evaluate mortar in accordance with ASTM C780.

END OF SECTION

SECTION 06 20 00 FINISH CARPENTRY

PART 1 GENERAL

1.1 REQUIREMENTS

- A. Division 1, General Conditions, Supplementary General Conditions, the Drawings, and all other parts of the Contract Documents are hereby made a part of this Section.

1.2 SUMMARY

- A. Section includes finish carpentry items furnished and installed:
1. Exterior wood cornices, gutters, soffits, fascia, trim at various locations as noted on the drawings.
 2. Wood bulkhead frame, trim and doors.
 3. Wood shingle siding, exterior trim and attachment accessories as noted in drawings.
 4. Column repair at porticos.
- B. RELATED SECTIONS
1. Section 06 10 00 – Rough Carpentry
 2. Section 07 31 29 – Wood Shingles Roofing
 3. Section 07 46 24 Wood Shingles Siding
 4. Section 07 71 23 – Wooden Gutters and Metal Downspouts
 5. Section 09 90 00 – Painting

1.3 REFERENCES

- A. American National Standards Institute:
1. ANSI A135.4 - Basic Hardboard.
 2. ANSI A208.1 - Mat-Formed Wood Particleboard.
- B. APA-The Engineered Wood Association:
1. APA/EWA PS 1 - Voluntary Product Standard for Construction and Industrial Plywood.
- C. American Society for Testing and Materials:
1. ASTM E84 - Standard Test Method for Surface Burning Characteristics of Building Materials.
- D. Architectural Woodwork Institute:
1. AWI - Quality Standards Illustrated, 8th edition
- E. American Wood-Preservers' Association:
1. AWPA C1 - All Timber Products - Preservative Treatment by Pressure Process.
- F. Federal Specification Unit:
1. FS A-A-1936 - Adhesive, Contact, Neoprene Rubber.
- G. Hardwood Plywood and Veneer Association:

1. HPVA HP-1 - American National Standard for Hardwood and Decorative Plywood.
- H. National Institute of Standards and Technology:
1. NIST PS 20 - American Softwood Lumber Standard.
- I. National Electrical Manufacturers Association:
1. NEMA LD 3 - High Pressure Decorative Laminates.

1.4 SUBMITTALS

- A. Section 01 30 00 – Submittal Procedures.
- B. Section 01 60 00 – Substitution Procedures
- C. Shop Drawings: Indicate materials, component profiles, fastening methods, jointing details, accessories, and grain direction, to minimum scale of 3" inch to 1 ft.
- D. Product Data:
1. Submit data on fire retardant treatment materials and application instructions.
 2. Submit data on attachment hardware, finish hardware, and prefinish materials.
- E. Samples:
1. Submit two samples of finish plywood, 8 x 10 inch in size illustrating wood grain and specified finish.
 2. Submit two samples of wood trim 10 inch long.
 3. Submit two samples of laminates, synthetic surfacing, hardware items, shop finishes.
- F. Certification: Submit copy of fabricator's authorization to use AWI Grade Stamps.

1.5 QUALITY ASSURANCE

- A. Perform work in accordance with AWI (Architectural Woodwork Institute -Architectural Woodwork Quality Standards Illustrated, Premium Grade for clear or transparent finished fabrications and custom grade for painted fabrications.

1.6 QUALIFICATIONS

- A. **Qualifications of Trade: This is an historic building and all work must be performed per the Secretary of the Interior's Standards of Historic Preservation. Work under this section must be performed by companies who can demonstrate more than five years specialized experience working on finish wood carpentry restoration projects.**
- B. **Field staff: Project superintendent or foreman shall have a minimum of five years documented experience with work of this type and all installers on the job shall have a minimum of three years documented experience in work of this type and documented experience with three projects listed on the National Register of Historic Places.**

1.7 FIELD MEASUREMENTS

- A. Verify field measurements prior to fabrication.

1.8 SEQUENCING

- A. Sequence work to ensure utility connections are achieved in orderly and expeditious manner.

1.9 COORDINATION

- A. Section 01 30 00 – Coordination and Meetings: Coordination and project conditions.
- B. Coordinate work with electrical rough-in and installation of associated and adjacent components, and specified ecclesiastical equipment.

PART 2 PRODUCTS

2.1 COMPONENTS

- A. Softwood Lumber: AWI Grade I; maximum moisture content of 6-8 percent; and the following:
 - 1. Species of Wood: Eastern white pine.
 - 2. Cut or Slicing of Wood: Plain sawn.
 - 3. Matching of Individual Leaves to Each Other; random matching.
- B. Softwood Lumber: AWI Grade I; maximum moisture content of 6-8 percent; and the following:
 - 1. Species of Wood: Ponderosa Pine.
 - 2. Cut or Slicing of Wood: Plain sawn.
 - 3. Matching of Individual Leaves to Each Other; random matching.
- C. Hardboard: AHA A135.4; Pressed wood fiber with resin binder, tempered grade, 1/4 inch thick, smooth two sides.
- D. Sheet Metal Components: Stainless steel, Type 304 with #4 satin finish; 1/16 inch thick.

2.2 ACCESSORIES

- A. Fasteners: Of size and type to suit application; painted finish in concealed locations and satin stainless finish in exposed locations.
- B. Concealed Joint Fasteners: Threaded steel.
- C. Lumber for Shimming, Blocking, and Furring: Softwood lumber of pine species.
- D. Wood Edge Trim: wood bullnose to match species, graining and coloration.
- E. Glass: Type as specified below or as required in Sections 08 52 00, 08 53 13, 08 60 00.
- F. Primer: Alkyd primer sealer type.
- G. Wood Filler: Oil base, tinted to match surface finish color.
- H. Wood Treatment:

1. Fire Retardant (FR-S Type): Chemically treated and pressure impregnated; capable of providing maximum flame spread/smoke development rating of 0-25 / <450 in accordance with ASTM E84.
2. Wood Preservative by Pressure Treatment (PT Type): AWWPA Treatment C1 using water borne chromated Copper Arsenate (CCA) preservative with 0.25 lbs/cu ft retention.
3. Water Repellant Preservative Treatment by Dipping Method: WDMA I.S.4, with 0.25 cubic lbs/in/ft of chromated copper arsenate.
4. Wood Preservative (Surface Application): Clear at exposed framing locations, colored at concealed framing locations, Cuprinol water reducible type, manufactured by Sherwin Williams.
5. Shop pressure treat wood materials requiring fire rating to conceal wood blocking.
6. Provide identification on fire retardant treated material.
7. Deliver fire retardant treated materials cut to required sizes. Minimize field cutting.
8. Redry wood after pressure treatment to maximum percent moisture content.

PART 3 EXECUTION

3.1 EXAMINATION

- A. Section 01 30 00 - Submittals: Coordination and project conditions.
- B. Verify adequacy of backing and support framing.
- C. Verify mechanical, electrical, and building items affecting work of this section are placed and ready to receive this work.

3.2 INSTALLATION

- A. Install work in accordance with AWI Premium quality standard.
- B. Set and secure materials and components in place, plumb and level.
- C. Carefully scribe work abutting other components, with maximum gaps of 1/32 inch. Do not use additional overlay trim to conceal larger gaps.
- D. Install components with screws at 12 inch on center.
- E. Site Applied Wood Treatment:
 1. Apply preservative treatment.
 2. Brush apply two coats of preservative treatment on wood in contact with cementitious materials and roofing and related metal flashings. Treat site-sawn cuts.
 3. Allow preservative to dry prior to erecting members.
- F. Preparation For Site Finishing:
 1. Set exposed fasteners. Apply wood filler in exposed fastener indentations. Sand work smooth.
 2. Before installation, prime paint surfaces of items or assemblies to be in contact with cementitious materials.

3.3 ERECTION TOLERANCES

- A. Section 01 40 00 - Quality Control: Tolerances.
- B. Maximum Variation from Indicated Position: 1/16 inch.
- C. Maximum Offset from Alignment with Abutting Materials: 1/32.

3.4 SCHEDULES

- A. Exterior:
 - 1. Clapboard where noted on drawings: Softwood; prepare for paint finish.
 - 2. Wood Trim where noted on drawings: Softwood; prepare for paint finish.
 - 3. Window Casings and Moldings: Softwood; prepare for paint finish.

END OF SECTION

THIS PAGE LEFT INTENTIONALLY BLANK

SECTION 07 31 29 WOOD SHINGLES ROOFING

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

- A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and Division 01 Specification Sections, apply to this Section.

1.2 SUMMARY

- A. Section Includes the following as indicated on the drawings:
 - 1. Wood roof shingles
 - 2. Drainage Mat
 - 3. Underlayment
 - 4. Metal flashing and trim.
- B. Summary of Work:
 - 1. Replacement of existing cedar shingle roof with new cedar shingle roof as indicated on the drawings.
 - 2. Replacement of existing underlayment with new peel & stick underlayment, 100% of roof deck as indicated on the drawings
 - a. Installation of new nylon venting underlayment as indicated on the drawings.
 - b. Installation of new flashing at roof including at valleys, ridges and other areas indicated on drawings.
 - 3. Replacement of roof deck quantity identified in drawings, locations to be determined after demolition of existing roof.
- C. Related Requirements:
 - 1. Section 07 46 24 Wood Shingle and Shake Siding
 - 2. Section 07 62 00 Sheet Metal Flashing and Trim

1.3 DEFINITIONS

- A. Roofing Terminology: See ASTM D 1079 and glossary in NRCA's "NRCA Roofing and Waterproofing Manual" for definitions of terms related to roofing work in this Section.

1.4 INITIAL ACTION SUBMITTALS

- A. Product Cut Sheets: For each type of product.
- B. Samples: For each exposed product in sizes indicated.
 - 1. Wood Shingles: Full size unit.

- 2. Ridge Units: Full size unit.
 - C. Samples for Initial Selection: For each type of wood product indicated.
 - 1. Include Samples of accessories involving color selection.
 - D. Samples for Verification: For the following products:
 - 1. Wood Roof Shingles: Full size.
 - 2. Ridge Shingles: Full size.
- 1.5 INFORMATIONAL SUBMITTALS
- A. Qualification Data: For Installer.
 - B. Evaluation Reports: For wood products, from ICC-ES.
 - C. Sample Warranty: For special warranties.
- 1.6 CLOSEOUT SUBMITTALS
- A. Maintenance Data for all products to be included in maintenance manuals.
- 1.7 MAINTENANCE MATERIAL SUBMITTALS
- A. Furnish extra materials that match products installed and that are packaged with protective covering for storage and identified with labels describing contents.
 - 1. Wood Roof Shingles: **100 sq. ft.** of each type, in unbroken bundles.
- 1.8 QUALITY ASSURANCE
- A. Installer Qualifications: Approved by CSSB.
 - B. **This building is on the National Register of Historic Places.**
 - C. **Installer shall be a company specializing in work of this section with a minimum of five years documented experience and demonstrated previous experience on a minimum of three buildings or structures that are listed in the National Register of Historic Places or the equivalent as determined by Architect.**
 - D. Grading Agency Qualifications: An independent testing and inspecting agency recognized by authorities having jurisdiction as qualified to label wood products for compliance with referenced grading rules.
 - E. Mockups: Build mockups to verify selections made under Sample submittals, to demonstrate aesthetic effects, and to set quality standards for materials and execution.
 - 1. Build mockups for wood products including accessories.

- a. Size: **48 inches long by 48 inches wide.**
2. Approval of mockups does not constitute approval of deviations from the Contract Documents contained in mockups unless Architect specifically approves such deviations in writing.
3. Subject to compliance with requirements, approved mockups may become part of the completed Work if undisturbed at time of Substantial Completion.

1.9 ROOFING MATERIALS DELIVERY, STORAGE, AND HANDLING

- A. Store roofing materials in a dry, well-ventilated location protected from weather and moisture according to manufacturer's written instructions.
- B. Store underlayment rolls on end, on pallets or other raised surfaces. Do not double stack rolls. Protect from sunlight until installation.
- C. Protect unused roofing materials from weather and moisture when left overnight or when work is not in progress.
- D. Handle, store, and place roofing materials in a manner to prevent damage to roof deck or structural supporting members.

1.10 PROJECT CONDITIONS

- A. Weather Limitations: Proceed with installation only when existing and forecasted weather conditions permit product installation and related work to be performed according to manufacturer's written instructions and warranty requirements.
 1. Install self-adhering sheet underlayment within the range of ambient and substrate temperatures recommended by manufacturer.

1.11 WARRANTY

- A. Special Materials Warranty: Manufacturer's warranty administered by CSSB and on CSSB's standard form in which the Manufacturer agrees to repair or replace CSSB-labeled products that fail in materials within specified warranty period. Material failures include manufacturing defects that result in leaks.
 1. Materials Warranty Period: Limited lifetime from date of Substantial Completion.
- B. Installer's Warranty: On warranty form at end of this Section, signed by Installer, in which Installer agrees to repair or replace installed products that fail in materials or workmanship within specified warranty period.
 1. Warranty Period: **Five** years from date of Substantial Completion.

PART 2 - PRODUCTS

2.1 PERFORMANCE REQUIREMENTS

- A. Decay Resistance: Provide wood products treated according to AWWPA U1, copper azole CA-C, UC3A pressure treatment; with a minimum of **0.40 lb/cu. ft.** retention.
 - 1. Identification: Attach a label to each bundle of wood products; identify manufacturer, chemical treatment, method of application, purpose of treatment, and warranties available.
- B. Grading Rules: Provide wood products that comply with **Cedar Shake & Shingle Bureau's (CSSB)** grading rules for products indicated.
 - 1. Identification: Attach a label to each bundle of wood products that identifies manufacturer, type of product, grade, dimensions, and identification mark of grading agency acceptable to authorities having jurisdiction.

2.2 ROOF SHINGLES

- A. Cedar Shingles: Smooth-sawn western red cedar shingles.
 - 1. Grade: **No. 1**, with starter courses of No. 2.
 - 2. Size: 16 inches long; 0.40 inch thick at butt.
- B. Cedar Ridge Units: Manufactured, smooth-sawn western red cedar caps for ridges and hips of same thickness as shingles, **7 inches** wide; beveled, alternately overlapped, and nailed.
 - 1. Grade: **No. 1**
 - 2. Length: 16 inches

2.3 UNDERLAYMENT MATERIALS

- A. Self-Adhering Sheet Underlayment, Polyethylene Faced: ASTM D 1970/D 1970M, minimum of **40-mil** thick, slip-resisting, polyethylene-film-reinforced top surface laminated to SBS-modified asphalt adhesive, with release backing; cold applied.
 - 1. Acceptable Manufacturers:
 - a. GAF Materials Corporation
 - b. Owens Corning
 - c. Tamko Building Products, Inc
 - d. Or Equals

2.4 ACCESSORIES

- A. Drainage Mat: Manufacturer's standard, compression-resisting, three-dimensional, nonwoven, entangled filament, nylon mat designed to permit air movement and to drain incidental moisture by gravity.

1. Acceptable Manufacturers:
 - a. Benjamin Obdyke, Cedar Breather
 - b. Advanced Building Products, R-Vent
 - c. Bonar, Enkamat
 - d. Or Equals
- B. Roofing Nails: ASTM F 1667, hot-dip galvanized-steel box-type wire nails, sharp pointed, and of sufficient length to penetrate a minimum of **3/4 inch** into sheathing.
 1. Where nails are in contact with metal flashing, use nails made from same metal as flashing.
- C. Roofing Staples: Type 304, stainless-steel staples, **0.05-inch thick**, with a minimum of **7/16-inch** crown width, of sufficient length to penetrate a minimum of **3/4 inch** into sheathing.

2.5 METAL FLASHING AND TRIM

- A. General: Comply with requirements in Section 076200 "Sheet Metal Flashing and Trim."

PART 3 - EXECUTION

3.1 EXAMINATION

- A. Examine substrates, areas, and conditions, with Installer present, for compliance with requirements for installation tolerances and other conditions affecting performance of the Work.
 1. Examine roof sheathing to verify that sheathing joints are supported by framing and blocking or metal clips and that installation is within flatness tolerances.
 2. Verify that substrate is sound, dry, smooth, clean, sloped for drainage, and completely anchored and that provisions have been made for flashings and penetrations through wood roofing.
- B. Prepare written report, endorsed by Installer, listing conditions detrimental to performance of the Work.
- C. Proceed with installation only after unsatisfactory conditions have been corrected.

3.2 UNDERLAYMENT INSTALLATION

- A. General: Comply with underlayment manufacturer's written installation instructions applicable to products and applications indicated unless more stringent requirements apply.
- B. Self-Adhering Sheet Underlayment: Install, wrinkle free, on roof deck. Comply with low-temperature installation restrictions of underlayment manufacturer if applicable. Install lapped in direction that sheds water. Lap sides not less than **3-1/2 inches**. Lap ends not less than **6 inches**, staggered **24 inches** between courses. Roll laps with roller. Cover underlayment within seven days.

1. Solid Sheathing: Install underlayment on entire area of roof deck parallel with and starting at the eaves. Lap sides a minimum of **2 inches** over underlying course. Lap ends a minimum of **4 inches**. Stagger end laps between succeeding courses at least **72 inches**.
2. Install fasteners at no more than 36 inches o.c. OR 12 inches o.c. between side laps and 6-inch spacing at side laps.
3. Dormers, Chimneys, Skylights, and Other Roof-Penetrating Elements: Extend **18 inches** beyond penetrating elements and return vertically against penetrating elements not less than **4 inches**.

3.3 METAL FLASHING INSTALLATION

- A. General: Install metal flashings and other sheet metal to comply with requirements in Section 076200 "Sheet Metal Flashing and Trim."

3.4 ROOF-SHINGLE INSTALLATION

- A. General: Install wood-shingle roofing according to manufacturer's written instructions and to recommendations in CSSB's "New Roof Construction Manual" and NRCA's "NRCA Roofing Manual: Steep-Slope Roofing Systems."
- B. Install drainage mat perpendicular to roof slope in parallel courses, butting edges and ends to form a continuous layer, and fasten to roof deck.
- C. Install wood-shingle starter course along lowest roof edge.
 1. Install in double layer with joints offset a minimum of 1-1/2 inches.
 2. Extend 1 inch-over fascia.
 3. Extend 1 inch over rake edge.
- D. Install first course of wood shingles directly over starter course and in continuous straight-line courses across roof deck. Install second and succeeding courses of wood shingles in continuous straight-line courses across roof deck.
 1. Extend 1 inch-over rake edge.
 2. Offset joints between shingles in succeeding courses a minimum of **1-1/2 inches**. Do not allow alignment of vertical joints in alternate courses.
 3. Space shingles a minimum of **1/4 inch** and a maximum of **3/8 inch** apart.
 4. Fasten each shingle with two nails spaced **3/4 to 1 inch** from edge of shingle and **1-1/2 to 2 inches** above butt line of succeeding course. Drive fasteners flush with top surface of shingles without crushing wood.
 5. Maintain weather exposure of 5 inches for 16-inch-long shingles.
- E. Open Valley at Asphalt Shingle to Cedar Shingle conditions only as indicated on the drawings: Cut and fit wood shingles at open valleys, trimming upper concealed corners of shingles. **Maintain uniform width of exposed open valley** from highest to lowest point.

3.5 ROOFING INSTALLER'S WARRANTY

- A. WHEREAS <Insert name> of <Insert address>, herein called the "Roofing Installer," has performed roofing and associated work ("the work") on the following project:
1. Owner: <Insert name of Owner>.
 2. Address: <Insert address>.
 3. Building Name/Type: <Insert information>.
 4. Address: <Insert address>.
 5. Area of the Work: <Insert information>.
 6. Acceptance Date: <Insert date>.
 7. Warranty Period: <Insert time>.
 8. Expiration Date: <Insert date>.
- B. AND WHEREAS Roofing Installer has contracted (either directly with Owner or indirectly as a subcontractor) to warrant the work against leaks and faulty or defective materials and workmanship for designated Warranty Period,
- C. NOW THEREFORE Roofing Installer hereby warrants, subject to terms and conditions herein set forth, that during Warranty Period he will, at his own cost and expense, make or cause to be made such repairs to or replacements of the work as are necessary to correct faulty and defective work and as are necessary to maintain the work in a watertight condition.
- D. This Warranty is made subject to the following terms and conditions:
1. Specifically excluded from this Warranty are damages to the work and other parts of the building, and to building contents, caused by:
 - a. Lightning;
 - b. Peak gust wind speed exceeding **110** mph;
 - c. Fire;
 - d. Failure of roofing system substrate, including cracking, settlement, excessive deflection, deterioration, and decomposition;
 - e. Faulty construction of parapet walls, copings, chimneys, skylights, vents, equipment supports, and other edge conditions and penetrations of the work;
 - f. Vapor condensation on bottom of roofing; and
 - g. Activity on roofing by others, including construction contractors, maintenance personnel, other persons, and animals, whether authorized or unauthorized by Owner.
 2. When the work has been damaged by any of foregoing causes, Warranty shall be null and void until such damage has been repaired by Roofing Installer and until cost and expense thereof have been paid by Owner or by another responsible party so designated.

3. Roofing Installer is responsible for damage to the work covered by this Warranty but is not liable for consequential damages to building or building contents resulting from leaks or faults or defects of the work.
 4. During Warranty Period, if Owner allows alteration of the work by anyone other than Roofing Installer, including cutting, patching, and maintenance in connection with penetrations, attachment of other work, and positioning of anything on roof, this Warranty shall become null and void on date of the alterations, but only to the extent the alterations affect the work covered by this Warranty. If Owner engages Roofing Installer to perform the alterations, Warranty shall not become null and void unless Roofing Installer, before starting the alterations, notified Owner in writing, showing reasonable cause for claim, that the alterations would likely damage or deteriorate the work, thereby reasonably justifying a limitation or termination of this Warranty.
 5. During Warranty Period, if original use of roof is changed and it becomes used for, but was not originally specified for, a use or service more severe than originally specified, this Warranty shall become null and void on date of the change, but only to the extent the change affects the work covered by this Warranty.
 6. Owner shall promptly notify Roofing Installer of observed, known, or suspected leaks, defects, or deterioration and shall afford reasonable opportunity for Roofing Installer to inspect the work and to examine evidence of such leaks, defects, or deterioration.
 7. This Warranty is recognized to be the only warranty of Roofing Installer on the work and shall not operate to restrict or cut off Owner from other remedies and resources lawfully available to Owner in cases of roofing failure. Specifically, this Warranty shall not operate to relieve Roofing Installer of responsibility for performance of the work according to requirements of the Contract Documents, regardless of whether Contract was a contract directly with Owner or a subcontract with Owner's General Contractor.
- E. IN WITNESS THEREOF, this instrument has been duly executed this **<Insert day>** day of **<Insert month>**, **<Insert year>**.
1. Authorized Signature: **<Insert signature>**.
 2. Name: **<Insert name>**.
 3. Title: **<Insert title>**.

END OF SECTION 073129

SECTION 074624 WOOD SHINGLE SIDING

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

- A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and Division 01 Specification Sections, apply to this Section.

1.2 SUMMARY

A. Section Includes:

- 1. Wood-shingle siding infill siding at windows and roof intersections as indicated on the drawings.

B. Related Requirements:

- 1. Section 07 31 29 "Wood Shingles Roofing

1.3 INITIAL ACTION SUBMITTALS

A. Product Data: For each type of product.

B. Samples: For each exposed product and for each color and finish specified, in sizes indicated.

- 1. Wood Shingles: Full size unit.

C. Samples for Initial Selection: For each type of siding product with factory-applied finishes.

D. Samples for Verification: For the following products, of sizes indicated, to verify color and finish selected.

- 1. Wood Shingles: Full size.

E. Air Drying Certificate

- 1. Shingles must be air dried, not kiln dried. Certificate of Air Dried Shingles required.

1.4 INFORMATIONAL SUBMITTALS

A. Qualification Data: For Installer.

B. Sample Warranty: For special warranties.

1.5 CLOSEOUT SUBMITTALS

- A. Maintenance Data: For siding to include in maintenance manuals.

1.6 MAINTENANCE MATERIAL SUBMITTALS

- A. Furnish extra materials that match products installed and that are packaged with protective covering for storage and identified with labels describing contents.
 - 1. Wood Shingles: **100 sq. ft.** of each type, color, and finish, in unbroken bundles.

1.7 QUALITY ASSURANCE

- A. Installer Qualifications: Approved by CSSB.
- B. Grading Agency Qualifications: An independent testing and inspecting agency recognized by authorities having jurisdiction as qualified to label siding for compliance with referenced grading rules.
- C. Mockups: Build mockups to verify selections made under Sample submittals, to demonstrate aesthetic effects, and to set quality standards for materials and execution.
 - 1. Build mockups for siding including accessories.
 - a. Size: **48 inches long by 48 inches wide.**
 - 2. Approval of mockups does not constitute approval of deviations from the Contract Documents contained in mockups unless Architect specifically approves such deviations in writing.
 - 3. Subject to compliance with requirements, approved mockups may become part of the completed Work if undisturbed at time of Substantial Completion

1.8 DELIVERY, STORAGE, AND HANDLING

- A. Store siding in a dry, well-ventilated, weathertight location according to manufacturer's written instructions.
- B. Store rolls of felt used for weather-resistive barrier on end, on pallets or other raised surfaces. Do not double stack rolls.
 - 1. Protect unused felt from weather, sunlight, and moisture when left overnight or when work is not in progress.

1.9 PROJECT CONDITIONS

- A. Weather Limitations: Proceed with installation only when existing and forecasted weather conditions permit siding installation and related work to be performed according to manufacturer's written instructions.
 - 1. Field-Finished Siding: Proceed with installation of siding only when existing and forecast weather conditions permit installation and the immediate application of at least one coat of specified finish on siding before it is exposed to rain, snow, or dampness.
 - a. Proceed with installation only after base or primer coat has been applied to every surface of siding units and has dried.

1.10 WARRANTY

- A. Special Materials Warranty: Manufacturer's warranty administered by CSSB and on CSSB's standard form in which Manufacturer agrees to repair or replace CSSB-labeled products that fail in materials within specified warranty period. Material failures include manufacturing defects that result in leaks.
 - 1. Materials Warranty Period: Limited lifetime from date of Substantial Completion.

PART 2 - PRODUCTS

2.1 PERFORMANCE REQUIREMENTS

- A. Decay Resistance: Provide wood products that are preservative treated according to AWPAC U1, (CA-C, UC3A) pressure treatment; with a minimum of 0.40 lb/cu. ft.retention.
 - 1. Identification: Attach a label to each bundle of wood products; identify manufacturer and include chemical treatment, method of application, purpose of treatment, and warranties available.
- B. Grading Rules: Provide siding that complies with CSSB's grading rules for products indicated.
 - 1. Identification: Attach a label to each bundle of siding that identifies manufacturer, type of product, grade, dimensions, and identification mark of grading agency.

2.2 UNDERCOURSING

- A. Cedar Undercoursing Shingles: Quarter-sawn Eastern White cedar shingles.
 - 1. Size: 16 inches long; 0.40 inch thick
 - 2. Grade: Select.

3. Finish: **Match exposed siding.**

2.3 EXPOSED SHINGLE SIDING

- A. Acceptable Manufacturers:
 1. True North Cedar, Inc.
 2. Dow's Eastern White Cedar Shingle
 3. Boise Cascade North East
 4. Bear Creek Lumber
 5. Or Equals
- B. Quarter-Sawn Eastern White cedar shingles:
 1. Grade: Select.
 2. Size: **16 inches long; 0.40 inch thick** at butt.

2.4 ACCESSORIES

- A. Felt Weather-Resistive Barrier: ASTM D 226/D 226M, Type II , asphalt-saturated organic felt, nonperforated.
- B. Flexible Flashing: Composite, self-adhesive, flashing product consisting of a pliable rubberized-asphalt compound bonded to a high-density polyethylene film, aluminum foil, or spun-bonded polyolefin.
 1. Acceptable Manufacturers:
 - a. Advanced Building Products Inc.
 - b. Carlisle Residential; a division of Carlisle Construction Materials.
 - c. Grace Construction Products; W.R. Grace & Co. – Conn.
 - d. Or Equals
 2. Minimum Overall Thickness: 0.040 inch
 3. Primer for Flexible Flashing: Product recommended by manufacturer of flexible flashing for applicable substrate.
- C. Nails: ASTM F 1667, **hot-dip galvanized-steel** wire nails, sharp pointed, and of sufficient length to penetrate a minimum of **3/4 inch** into sheathing.
 1. Shingles: Use shingle type nails.
 2. Felt Weather-Resistive Barrier: Use roofing nails.
 3. Nails in Contact with Metal Flashing: Use nails made from same metal as flashing.

PART 3 - EXECUTION

3.1 EXAMINATION

- A. Examine substrates, areas, and conditions, with Installer present, for compliance with requirements for installation tolerances and other conditions affecting performance of the Work.
- B. Prepare written report, endorsed by Installer, listing conditions detrimental to performance of the Work.
- C. Proceed with installation only after unsatisfactory conditions have been corrected.

3.2 FELT WEATHER-RESISTIVE BARRIER INSTALLATION

- A. General: Comply with felt manufacturer's written installation instructions and CSSB recommendations applicable to products and applications indicated unless more stringent requirements apply.
- B. Cover exposed exterior surface of sheathing with felt nailed to framing immediately after sheathing is installed.
 - 1. Apply horizontally with a **2-inch** overlap and a **6-inch** end lap. Wrap around inside and outside corners **4 inches**.
 - 2. Cut back felt **1/2 inch** on each side of the break in supporting members at expansion- or control-joint locations.
 - 3. Apply felt to cover vertical flashing with a minimum **4-inch** overlap unless otherwise indicated.

3.3 FLEXIBLE FLASHING INSTALLATION

- A. Apply flexible flashing to comply with manufacturer's written instructions.
 - 1. Prime substrates as recommended by flashing manufacturer.
 - 2. Lap seams and junctures with other materials at least **4 inches** except that at flashing flanges of other construction, laps need not exceed flange width.
 - 3. Lap flashing over felt weather-resistive barrier at bottom and sides of openings.
 - 4. Lap felt weather-resistive barrier over flashing at heads of openings.
 - 5. After flashing has been applied, roll surfaces with a hard rubber or metal roller to ensure that flashing is completely adhered to substrates.

3.4 SINGLE-COURSED WALLS

- A. Install products according to manufacturer's written instructions and recommendations in CSSB's "Exterior and Interior Wall Manual."
- B. Install products, beginning at base of wall.

- C. Starter Undercourse: Install a single course of undercoursing at the base of the wall in a continuous straight line.
1. Extend 1-1/2 inches below top of foundation wall.
 2. Match fastening and corner treatment of siding.
- D. Exposed Siding:
1. Install starter (first) course of exposed siding over starter undercourse with butts **1/2 inch** lower than undercourse butts.
 2. Offset joints in first course of exposed siding a minimum of **1-1/2 inches** from joints in starter undercourse.
 3. Install succeeding exposed siding courses with joints offset a minimum of **1-1/2 inches** between adjacent courses.
 4. Install exposed siding courses with butt lines even.
 5. Fasten each unit with two concealed nails spaced **3/4 to 1 inch** from edges and **1 inch** above butt line of succeeding course. For units wider than **10 inches**, add two concealed fasteners, spaced **1 inch** apart, to the center of the unit. Drive fasteners flush with top surface of units without crushing wood.
 6. Interior Corner Treatment: None.
 7. Exterior Corner Treatment: Laced.
- E. Weather Exposure and Spacing:
1. Shingles:
 - a. Maintain maximum weather exposure of match existing long shingles.
 - b. Space shingles 1/8 to 1/4 inch apart.

END OF SECTION 074624

SECTION 07 62 00
SHEET METAL FLASHING AND TRIM

PART 1 GENERAL

1.1 REQUIREMENTS

- A. Attention is directed to the CONTRACT AND GENERAL CONDITIONS and all Sections within DIVISION 1 - GENERAL REQUIREMENTS, which are hereby made a part of this section of the specifications.

1.2 SUMMARY

- A. Section includes flashings and counterflashings.
- B. Provide zinc coated copper flashing for masonry restoration associated with repointing and reroofing. See Section 04 01 00 Maintenance of Masonry.

1.3 RELATED SECTIONS:

1. Division 1: General Requirements (All Sections)
2. Section 02 41 09 – Selective Structure Demolition
3. Section 04 01 00 – Maintenance of Masonry
4. Section 07 10 00 – Mortar and Masonry Grout
5. Section 07 31 29 – Wood Shingles Roofing

1.4 REFERENCES

- A. American Architectural Manufacturers Association:
1. AAMA 611 - Voluntary Specification for Anodized Architectural Aluminum.
 2. AAMA 2605 - Voluntary Specification, Performance Requirements and Test Procedures for Superior Performing Organic Coatings on Aluminum Extrusions and Panels.
- B. ASTM International:
1. ASTM B32 - Standard Specification for Solder Metal.
 2. ASTM B101 - Standard Specification for Zinc-Coated Copper Sheet and Strip for Building Construction.
 3. ASTM B370 - Standard Specification for Copper Sheet and Strip for Building Construction.
 4. ASTM D226 - Standard Specification for Asphalt-Saturated Organic Felt Used in Roofing and Waterproofing.
 5. ASTM D4586 - Standard Specification for Asphalt Roof Cement, Asbestos-Free.
- C. Copper Development Association Inc.:
1. CDA - Copper in Architecture - Handbook.
- D. Federal Specification Unit:
1. FS TT-C-494 - Coating Compound, Bituminous, Solvent Type, Acid Resistant.
- E. Sheet Metal and Air Conditioning Contractors:
1. SMACNA - Architectural Sheet Metal Manual.

1.5 SUBMITTALS

- A. Section 01 33 00 - Submittal Procedures: Submittal procedures.
- B. Shop Drawings: Indicate material profile, jointing pattern, jointing details, fastening methods, flashings, terminations, and installation details.
- C. Product Data: Submit data on manufactured components metal types, finishes, and characteristics.
- D. Samples:
 - 1. Submit two samples, 12-inch x length or width required inch in size illustrating typical seam, external corner, internal corner, ridge, junction to vertical dissimilar surface, material and finish.
 - 2. Submit two samples 12 x 12 inch in size illustrating metal finish color.

1.6 QUALIFICATIONS

- A. Fabricator and Installer: Company specializing in sheet metal work with minimum three years documented experience.

1.7 PRE-INSTALLATION MEETINGS

- A. Section 01 30 00 - Administrative Requirements: Pre-installation meeting.
- B. Convene minimum one week prior to commencing work of this section.

1.8 DELIVERY, STORAGE, AND HANDLING

- A. Section 01 60 00 - Product Requirements: Product storage and handling requirements.
- B. Stack material to prevent twisting, bending, and abrasion, and to provide ventilation. Slope metal sheets to ensure drainage.
- C. Prevent contact with materials causing discoloration or staining.

1.9 COORDINATION

- A. Coordinate with work of:
 - 1. Section 04 01 00 – Maintenance of Masonry
 - 2. Section 07 10 00 – Mortar and Masonry Grout
 - 3. Section 07 31 29 – Wood Shingles Roofing

PART 2 PRODUCTS

2.1 SHEET METAL FLASHING AND TRIM

- A. Copper: ASTM B101 soft temper, 16 oz/sq ft. – flashing at eaves, rakes, counterflashings, drip edges.
- B. Zinc Coated Copper: ASTM B101 soft temper, 16 oz/sq ft. – flashing at masonry lintels.

2.2 ACCESSORIES

- A. Fasteners: Same material and finish as flashing metal with soft neoprene washers.
- B. Underlayment: ASTM D226, organic roofing felt, Type I, No. 30 at shingle roof.
- C. Ice and water shield as manufactured by WR Grace Company.
- D. Sealant: Type E butyl sealant.
- E. Plastic Cement: ASTM D4586, Type I.
- F. Solder: ASTM B32; type suitable for application and material being soldered.

2.3 FABRICATION

- A. Form sections shape indicated on Drawings, accurate in size, square, and free from distortion or defects.
- B. Fabricate cleats of same material as sheet metal, interlocking with sheet.
- C. Form pieces in longest possible lengths.
- D. Hem exposed edges on underside 1/2 inch; miter and seam corners.
- E. Form material with flat lock seams, except where otherwise indicated. At moving joints, use sealed lapped, bayonet-type or interlocking hooked seams.
- F. Tin edges of copper sheet to be soldered. Solder shop formed metal joints. After soldering, remove flux. Wipe and wash solder joints clean. Weather seal joints.
- G. Fabricate corners from one piece with minimum 18-inch long legs; seam at aluminum, solder at lead coated for rigidity, seal with sealant.
- H. Fabricate vertical faces with bottom edge formed outward 1/4 inch and hemmed to form drip.
- I. Fabricate flashings to allow toe to extend 2 inches over roofing membrane. Return and brake edges.
- J. Fabricate accessories in profile and size to suit gutters and downspouts.
 - 1. Anchorage Devices: Type recommended by fabricator.
- K. Seal metal joints.

2.4 FACTORY FINISHING – N.A.

PART 3 EXECUTION

3.1 EXAMINATION

- A. Verify roof openings, curbs, pipes, sleeves, ducts, and vents through roof are solidly set, reglets in place, and nailing strips located.

- B. Verify roofing termination and base flashings are in place, sealed, and secure.

3.2 PREPARATION

- A. Install starter and edge strips, and cleats before starting installation.
- B. Install surface mounted reglets to lines and levels indicated on Drawings. Seal top of reglets with sealant.
- C. Paint concealed metal surfaces with protective backing paint to minimum dry film thickness of 15 mil.

3.3 INSTALLATION

- A. Secure flashings in place using concealed fasteners. Use exposed fasteners only where permitted.
- B. Apply plastic cement compound between metal flashings and felt flashings.
- C. Fit flashings tight in place. Make corners square, surfaces true and straight in planes, and lines accurate to profiles.
- D. Seal metal joints watertight. Solder metal joints for full metal surface contact at lead coated copper flashing only. After soldering, wash metal clean with neutralizing solution and rinse with water.
- E. Seal metal joints watertight.

3.4 FIELD QUALITY CONTROL

- A. Section 01 40 00 - Quality Requirements: Testing and Inspection Services.
- B. Inspection will involve surveillance of Work during installation to ascertain compliance with specified requirements.

3.5 SCHEDULE

- A. Through-Wall Flashing in Masonry:
 - 1. Material: Zinc Coated Copper at junctions with masonry walls at replaced lintels..
 - 2. 16 oz. Per square foot.
 - 3. Finish: zinc.
- B. Fascia and Cornices: Copper 20 oz. (None anticipated)
- C. Flashings Associated with Asphalt Shingle Roofing, including Valley, Hip, Ridge, Eave, Gutter Edge, Gable Edge, Chimney: 16 oz. copper
- D. Counterflashings: 16 oz. copper.
 - 1. Counterflashing over existing step flashing at chimney walls.
- E. Counterflashings at Curb-Mounted Roof Items,: 16 oz. copper.

END OF SECTION

THIS PAGE INTENTIONALLY BLANK

SECTION 09 90 00 PAINTING

PART 1 GENERAL

1.1 REQUIREMENTS

- A. Division 1, General Conditions, Supplementary General Conditions, the Drawings, and all other parts of the Contract Documents are hereby made a part of this Division.

1.2 SUMMARY

- A. Surface preparation and field application of paints and coatings of exterior surfaces as called for in the Drawings. Work includes:
 - 1. New gutters, fascia, soffit and trim on main building and additions as indicated on drawings.
 - 2. New and existing downspouts.
 - 3. Repaired portions of Porticos and columns.
 - 4. Exterior wood surfaces including sash, rails, stiles, frames, trim and muntins at existing windows and associated trim where indicated on drawings.
 - 5. Bulkhead walls, trim and doors.
 - 6. Touch up of existing surfaces affected by the Work.

1.3 RELATED SECTIONS

- Division 1 – General Requirements, all Sections
- Section 06 20 00 – Finish Carpentry
- Section 07 71 23 – Wooden Gutters and Metal Downspouts
- Section 07 90 00 – Joint Sealers

1.4 REFERENCES

- A. ASTM D16 - Definitions of Terms Relating to Paint, Varnish, Lacquer, and Related Products.
- B. ASTM D2016 - Test Method for Moisture Content of Wood.
- C. NPCA (National Paint and Coatings Association) - Guide to U.S. Government Paint Specifications.
- D. PDCA (Painting and Decorating Contractors of America) - Painting - Architectural Specifications Manual.

1.5 DEFINITIONS

- A. Conform to ASTM D16 for interpretation of terms used in this Section.

1.6 SUBMITTALS

- A. Submit under provisions of Section 01 30 00.
- B. Product Data: Provide data on all finishing products.
- C. Samples: Submit two samples, 4x4 inch in size illustrating colors for each color selected.
- D. Manufacturer's Instructions: Indicate special surface preparation procedures, substrate conditions requiring special attention, and maintenance recommendations.

1.7 QUALIFICATIONS

- A. Manufacturer: Company specializing in manufacturing the Products specified in this section with minimum three years documented experience.
- B. Qualifications of Trade: This is an historic building and all work must be performed per the Secretary of the Interior's Standards of Historic Preservation. Work under this section must be performed by companies who can demonstrate more than five years specialized experience working on painting of preservation and/or restoration projects on historic properties.
- C. Field staff: Project superintendent or foreman shall have a minimum of five years documented experience with work of this type and all installers on the job shall have a minimum of three years documented experience in work of this type and documented experience with three projects listed on the National Register of Historic Places.

1.8 STORAGE, AND HANDLING

- A. Deliver, store, protect and handle products to site under provisions of Section 01 60 00.
- B. Deliver products to site in sealed and labeled containers; inspect to verify acceptability.
- C. Container label to include manufacturer's name, type of paint, brand name, lot number, brand code, coverage, surface preparation, drying time, cleanup requirements, color designation, and instructions for mixing and reducing.
- D. Store paint materials at minimum ambient temperature of 45 degrees F (7 degrees C) and a maximum of 90 degrees F (32 degrees C), in ventilated area, and as required by manufacturer's instructions.

1.9 ENVIRONMENTAL REQUIREMENTS

- A. Do not apply materials when surface and ambient temperatures are outside the temperature ranges required by the paint product manufacturer.

- B. Do not apply exterior coatings during rain or snow, or when relative humidity is outside the humidity ranges required by the paint product manufacturer.
- C. Minimum Application Temperatures for Latex Paints: 45 degrees F (7 degrees C) for interiors; 50 degrees F (10 degrees C) for exterior; unless required otherwise by manufacturer's instructions.
- D. Minimum Application Temperature for Varnish Finishes: 65 degrees F (18 degrees C) for interior or exterior, unless required otherwise by manufacturer's instructions.
- E. Minimum Application Temperature for Oil based primer: 40 degrees F for interior or exterior, unless required otherwise by manufacturer's instructions.

1.10 EXTRA MATERIALS

- A. Furnish under provisions of Section 01 70 00.
- B. Provide 1 gallon of each color to Owner.
Label each container with color, type, texture, and location in addition to the manufacturer's label.

PART 2 PRODUCTS

2.1 MANUFACTURERS

- A. Manufacturers – Paint and Stain
 1. Benjamin Moore Company
 2. Duron Paints and Wallcovering Inc.
 3. PPG Pittsburgh Paints
 4. Sherwin Williams Paints
- B. Manufacturers - Primer Sealers: as required by paint manufacturer.
- C. Substitutions: Under provisions of Section 01 60 00. Any substitutions must be approved for color and manufacturer.

2.2 MATERIALS

- A. Coatings: Ready mixed, except field catalyzed coatings. Process pigments to a soft paste consistency, capable of being readily and uniformly dispersed to a homogeneous coating; good flow and brushing properties; capable of drying or curing free of streaks or sags.
- B. Accessory Materials: Linseed oil, shellac, turpentine, paint thinners and other materials not specifically indicated but required to achieve the finishes specified, of commercial quality.

2.3 FINISHES

- A. Refer to schedule at end of section for surface finish and color schedule.

PART 3 EXECUTION

3.1 EXAMINATION

- A. Verify site conditions under provisions of Section 01 30 00.
- B. Verify that surfaces are ready to receive work as instructed by the product manufacturer.
- C. Examine surfaces scheduled to be finished prior to commencement of work. Report any condition that may potentially affect proper application.
- D. Test shop applied primer for compatibility with subsequent cover materials.
- E. Measure moisture content of surfaces using an electronic moisture meter. Do not apply finishes unless moisture content of surfaces are below the following maximums:
 - 1. Interior Wood: 15 percent, measured in accordance with ASTM D2016.
 - 2. Exterior Wood: 15 percent, measured in accordance with ASTM D2016.

3.2 PREPARATION

- A. The Contractor shall ascertain the suitability of all surfaces to receive paint. He shall replace rotted wood, fill cracks as specified, putty holes and otherwise ensure a good paintable surface. He shall notify the Architect in writing of any defects detrimental to his work should they be beyond the realm of his responsibilities. The application of paint shall be construed as acceptance of surfaces by the Contractor, who will then be held responsible for the finished work.
- B. Correct defects and clean surfaces which affect work of this section. Remove existing coatings that exhibit loose surface defects. Prepare all surfaces by scraping and removing loose and deteriorated paint. Sand margins of scraped areas to feather to paint surface that remains.
 - 1. Surfaces previously painted with calcimine shall be peeled back, washed with bleach and TSP or an acceptable substitute, painted with an acrylic bonding agent. Edges shall be feathered with joint compound and painted with an oil primer.
- C. Seal wood surfaces with shellac and seal marks which may bleed through surface finishes.
- D. Impervious Surfaces: Remove mildew by scrubbing with solution of tri-sodium phosphate and bleach. Rinse with clean water and allow surface to dry.
- E. Gypsum Board Surfaces: Fill minor defects with filler compound. Spot prime defects after repair.

- F. Plaster Surfaces: Fill hairline cracks, small holes, and imperfections with latex patching plaster. Make smooth and flush with adjacent surfaces. Wash and neutralize high alkali surfaces.
- G. Interior Wood Items Scheduled to Receive Paint Finish: Wipe off dust and grit prior to priming. Prepare all surfaces by scraping and removing loose and deteriorated paint. Sand margins of scraped areas to feather to paint surface that remains. Seal knots, pitch streaks, and sappy sections with sealer. Fill nail holes and cracks after primer has dried; sand between coats.
- H. Exterior Wood Scheduled to Receive Paint Finish: Remove dust, grit, and foreign matter. Prepare all surfaces by scraping and removing loose and deteriorated paint. Sand margins of scraped areas to feather to paint surface that remains. Seal knots, pitch streaks, and sappy sections. Fill nail holes with tinted exterior calking compound after prime coat has been applied.
- I. Surfaces Scheduled to Have Paint Removed:
 - 1. After all protection is in place, brush, roll or spray non caustic paint stripper onto all surfaces to be stripped, applying the material heavy and thick to completely coat the surface.
 - 2. On wood surfaces in particular, completely remove the chemical as soon as the old paint has been loosened. Failure to do so would darken the wood and raise its grain. Wash with high-pressure rinse, not to exceed 1000 psi.
 - 3. Follow with neutralizing application as required by manufacturer.
 - 4. All surfaces must be tested for Ph after ten days, and must also be thoroughly dried before repainting. Ph must be neutral (7.0) or within documented acceptable ranges for final application of paint.
- J. Wood Windows Scheduled for Painting: Seal top and bottom edges with primer.

3.3 APPLICATION

- A. Apply products in accordance with manufacturer's instructions.
- B. Do not apply finishes to surfaces that are not dry.
- C. Apply each coat to uniform finish. Brush apply paint evenly without runs, sags or other defects, each coat shall be thoroughly worked into the material being coated at the average rate of coverage recommended by the material manufacturer for the type of surface involved. Cover all surfaces completely to provide uniform color and appearance. All parts of mouldings, trim, ornaments, edges and millwork shall be left clean and true to details without undue amount of paint in corners or depressions. Make edges of colors sharp and clean, without overlapping.
- D. Apply each coat of paint slightly darker than preceding coat unless otherwise approved.

- E. Sand wood and metal lightly between coats to achieve required finish.
- F. Vacuum clean surfaces free of loose particles. Use tack cloth just prior to applying next coat.
- G. Allow applied coat to dry before next coat is applied.
- H. Prime concealed surfaces of exterior woodwork with primer paint.
- I. The Contractor shall protect all surfaces from paint drips and spillage, as well as undue wear. Original surfaces are not to be damaged. Any paint on extraneous surfaces shall be thoroughly cleaned off at completion of the project.
- J. The Contractor shall remove all hardware, accessories, device plates, lighting fixtures, etc. or provide ample in place protection. Upon completion of each part of the work, all these are to be carefully replaced or uncovered. Use only skilled labor for removal, replacement and protection.
- K. Use dropcloths free of holes and of adequate size to protect all other surfaces.

3.4 FIELD QUALITY CONTROL

- A. Field inspection and testing will be performed under provisions of Section 01 40 00.

3.5 CLEANING

- A. Clean work under provisions of Section 01 70 00.
- B. Collect waste material which may constitute a fire hazard, place in closed metal containers and remove daily from site.
