Property Abutter

RE: 45 Plymouth Street Septic System Upgrade

Dear Board Members,

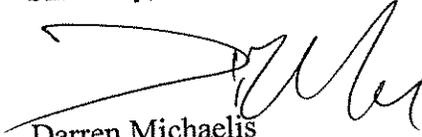

On behalf of my client, the property owner, I am requesting the following for the proposed installation of a new septic system on the property. The dwelling is a two family dwelling with a large bedroom count. Parking is required for the tenants and therefore, the following requests are made:

#### Local Upgrade Request:

1. A reduction of the required setback of the septic system from the property line from 10' to a minimum of 7' as shown on the plan per 310CMR Section 15.405(1)(b).
2. Substitution of a sieve analysis in lieu of a percolation test due to saturated conditions at time of test per 310CMR Section 15.405(1)(k).

The Board of Health Meeting will be held on Monday December 22<sup>nd</sup> in the Middleboro Town Hall Selectman meeting room on the first floor. The public meeting begins at 7:00 pm. If you should have any questions, please contact my office.

Sincerely,

  
Darren Michaelis  
Design Engineer
